web 30 jan 2020
what is a variable
basically a variable
is any factor that
can be controlled
changed or
measured in an
experiment
scientific
experiments have
several types of
variables the
independent and
dependent
variables are the
ones usually plotted
on a chart or graph

but there are other
types of variables
you may encounter
types of variables
web what is
variable in research
a variable is any
property
characteristic
number or a
quantity that
increases or
decreases over time
or can take on
different values as
opposed to
constants such as n
that do not vary in
different situations
when conducting
research
experiments often
manipulate
variables web 30
nov 2020 a
variable is a named
unit of data that is
assigned a value if
the value is
modified the name
does not change
variables are used
with most
programming

languages and
come in many forms
defined by the
script or software
programmer some
variables are
mutable meaning
their values can
change web
variable in
programming a
variable is a value
that can change
depending on
conditions or on
information passed
to the program
typically a program
consists of
instructions that
tell the computer
what to do and data
that the program
uses when it is
running the data
consists of
constants or fixed
values that never
change and variable
web 1 a likely to
change or vary
subject to variation
changeable b
inconstant fickle 2

biology tending to exhibit genetic variation or variation in a physical trait geographically variable color patterns 3 mathematics having no fixed quantitative value n 1 something that varies or is prone to variation 2 astronomy a variable star 3 web 28 dec 2022 a variable in c is a memory location associated with some name in order to store some form of data and retrieve it when required we can store different types of data in the variable and reuse the same variable for storing some other data any number of times for using a variable in c we have to first define it to tell the

compiler about its web variables are given a special name that only applies to experimental investigations one is called the dependent variable and the other the independent variable the independent variable is the variable the experimenter manipulates or changes and is assumed to have a direct effect on the dependent variable web in mathematical logic a variable is either a symbol representing an unspecified term of the theory a meta variable or a basic object of the theory that is manipulated without referring to its possible intuitive interpretation

contents 1 history 2 notation 3 specific kinds of variables 3 1 dependent and independent variables 3 2 examples web 23 jan 2023 variable mathematics wikipedia mathematics a quantity that may assume any one of a set of values mathematics a symbol representing a variable programming a named memory location in which a program can store intermediate results and from which it can read them astronomy a variable star web variables the following topics describe how to add and manage variables in your dashboards add and manage variables

inspect variables
variable syntax a
variable is a
placeholder for a
value you can use
variables in metric
queries and in
panel titles so when
you change the
value using the
dropdown at the
top of the
dashboard your
panel s web
definition of
variable more a
symbol for a value
we don t know yet
it is usually a letter
like x or y example
in $x^2 + 6x$ is the
variable why
variable when it
may have just one
value in the case of
 $x^2 + 6$ we can solve it
to find that $x = 4$ but
in something like $y = x^2 + a$
a linear
equation x can have
many values web a
variable can be
thought of as a box
that the computer

can use to store a
value the value held
in that box can
change or vary a
program can use as
many variables as it
needs it to all web

mathematics
science social
science specialized
uk 'veəri ə b ə l us
'ver i ə b ə l c l a
number amount or
situation that can
change the
variables in the web
26 jul 2021 in
science a variable is
any item factor or
condition that can
be controlled or
changed there are
three types of
variables in
scientific
experiments but we
will define them
later in the lesson
web 13 apr 2018
but a variable that
changes in direct
response to the
independent

variable is the
dependent variable
say there s an
experiment to test
whether changing
the position of an
ice cube affects its
ability to melt the
change in an ice
cube s position
represents the
independent
variable the result
of whether the ice
cube melts or not is
the web adjective
definition of
variable 1 as in
adjustable capable

expense that we
could reduce if we
needed to
synonyms similar
words relevance
adjustable changing
varying adaptable
flexible alterable
modifiable
changeable elastic
versatile fluctuating
malleable fluid
pliable unstable

labile inconstant
unsteady web 19
sep 2022 there are
three types of
categorical
variables binary
nominal and ordinal
variables note that
sometimes a
variable can work
as more than one
type an ordinal
variable can also be
used as a
quantitative
variable if the scale
is numeric and
doesn't need to be
kept as discrete
integers web a
variable in
mathematics is
defined as the
alphabetic
character that
expresses a
numerical value or
a number in
algebraic equations
a variable is used to
represent an
unknown quantity
these variables can
be any alphabets

from a to z most
commonly a b c x y
and z are used as
variables in
equations web the
variable is a like a
box or container
that holds the thing
that is changing the
box stays the same
but whatever is
inside can change
or vary web capable
of being varied or
changed alterable a
variable time limit
for completion of a
book inconstant
fickle a variable
lover having much
variation or
diversity noun
something web 13
jan 2023 every
variable has a type
that determines
what values can be
stored in the
variable c is a type
safe language and
the c compiler
guarantees that
values stored in
variables are

always of the
appropriate type
the value of a
variable can be
changed through
assignment or
through use of the
and operators web
variable computer
science a symbolic
name associated
with a value and
whose associated
value may be
changed variable
mathematics a
symbol that
represents a
quantity in a
mathematical
expression as used
in many sciences
variable research a
logical set of
attributes variable
star a type of
astronomical star
web find 35 ways to
say variable along

trusted free
thesaurus web 19
sep 2022 a
variable is a unit of
memory in which
values are stored in
powershell
variables are
represented by text
strings that begin
with a dollar sign
such as a process
or my var variable
names aren't case
sensitive and can
include spaces and
special characters
web 1 dec 2019
independent
variable the
independent
variable is the
condition that you
change in an
experiment it is the
variable you control
it is called
independent
because its value
does not depend on
and is not affected
by the state of any
other variable in
the experiment

sometimes you may
hear this variable
called the
controlled variable
web in algebra a
symbol usually a
letter standing in
for an unknown
numerical value in
an equation or an
algebraic
expression in
simple words a
variable is a
quantity that can be
changed and is not
fixed variables are
essential as they
form a major
algebra component
we usually use x
and y to express an
unknown integer
web variableness
'ver ē ə bəl nəs 'var
noun variably blē
adverb variable 2 of
2 noun 1 a a
quantity that may
take on any one of a
set of values b a
mathematical
symbol web
variables are

containers for
storing data values
like numbers and
characters in c
there are different
types of variables
defined with
different keywords
for example int
stores integers
whole numbers
without decimals
such as 123 or 123
float stores floating
point numbers with
decimals such as 19
99 or 19.99 char
stores single
characters such as
web a variable is a
quantity that may
be changed
according to the
mathematical
problem the
generic letters
which are used in
many algebraic
expressions and
equations are x y z
in other words a
variable is a symbol
for a number where
the value is not

known for example
x 5 10 here x is a
variable web in
science a variable is
any factor trait or
condition that can

exist in differing
amounts or types
scientists try to
figure out how the
natural world works
to do this they use

experiments to
search for cause
and effect
relationships
