Women Who Changed the World Mar 24 2022 A celebration of the achievements of womankind, this book honours fifty amazing women and the incredible impact they have had on our world. From empire builders and healers to daring explorers and iconoclastic thinkers, these are moving stories of dedication, conflict, tragedy and triumph, as dramatic as any fiction. Each will both inspire readers and provide a greater understanding of the crucial role these women played in shaping our culture and history, and the debt we owe them. Presented chronologically, from antiquity to the modern day, each of these remarkable women's stories is told with a complete biography, a timeline setting their achievement in its historical context, and a selection of little-known facts and intimate insights, alongside an iconic black-and-white image and one of their inspiring quotations. *Great Women in History* pays homage to fifty of the most influential and admired women of all time, including: Cleopatra, Mary Magdalene, Boudicca, Joan of Arc, Catherine the Great, Elizabeth I, Emmeline Pankhurst, Jane Austen, Amelia Earhart, Marie Curie, Florence Nightingale, Mother Teresa, Virginia Woolf, Eleanor Roosevelt, Helen Keller, Anne Frank, Katharine Hepburn, Simone de Beauvoir, Rosa Parks, Madame Mao, Eva Peron, Margaret Thatcher, Marilyn Monroe, Germaine Greer, Billie Jean King, Oprah Winfrey, Madonna and Princess Diana.

Forces of Nature Aug 24 2019 From the ancient world to the present women have been critical to the progress of science, yet their importance is overlooked, their stories lost, distorted, or actively suppressed. Forces

of Nature sets the record straight and charts the fascinating history of women's discoveries in science. In the ancient and medieval world, women served as royal physicians and nurses, taught mathematics, studied the stars, and practiced midwifery. As natural philosophers, physicists, anatomists, and botanists, they were central to the great intellectual flourishing of the Scientific Revolution and the Enlightenment. More recently women have been crucially involved in the Manhattan Project, pioneering space missions and much more. Despite their record of illustrious achievements, even today very few women win Nobel Prizes in science. In this thoroughly researched, authoritative work, you will discover how women have navigated a male-dominated scientific culture - showing themselves to be pioneers and trailblazers, often without any recognition at all. Included in the book are the stories of: Hypatia of Alexandria, one of the earliest recorded female mathematicians Maria Cunitz who corrected errors in Kepler's work Emmy Noether who discovered fundamental laws of physics Vera Rubin one of the most influential astronomers of the twentieth century Jocelyn Bell Burnell who helped discover pulsars

Misquoting Jesus Dec 21 2021 When world-class biblical scholar Bart Ehrman first began to study the texts of the Bible in their original languages he was startled to discover the multitude of mistakes and intentional alterations that had been made by earlier translators. In *Misquoting Jesus*, Ehrman tells the story behind the mistakes and changes that ancient scribes made to the New Testament and shows the great impact they had upon the Bible we use today. He frames his account with personal reflections on how his study of the Greek manuscripts made him abandon his once ultraconservative views of the Bible. Since the advent of the printing press and the accurate reproduction of texts, most people have assumed that when they read the New Testament they are reading an exact copy of Jesus's words or Saint Paul's writings. And yet, for almost fifteen hundred years these manuscripts were hand copied by scribes who were deeply influenced by the cultural, theological, and political disputes of their day. Both mistakes and intentional changes abound in the surviving manuscripts, making the original words difficult to reconstruct. For the first time, Ehrman reveals where and why these changes were made and how scholars go about reconstructing the original words of the New Testament as closely as possible. Ehrman makes the provocative case that many of our cherished biblical stories and widely held beliefs concerning the divinity of Jesus, the Trinity, and the divine origins of the Bible itself stem from both intentional and accidental alterations by scribes -- alterations that dramatically affected all subsequent versions of the Bible.

The Boy Who Changed the World Feb 08 2021 Did you know that

what you do today can change the world forever? *The Boy Who Changed the World* opens with a young Norman Borlaug playing in his family's cornfields with his sisters. One day, Norman would grow up and use his knowledge of agriculture to save the lives of two billion people. Two billion! Norman changed the world! Or was it Henry Wallace who changed the world? Or maybe it was George Washington Carver? This engaging story reveals the incredible truth that everything we do matters! Based on *The Butterfly Effect*, Andy's timeless tale shows children that even the smallest of our actions can affect all of humanity. The book is beautifully illustrated and shares the stories of Nobel Laureate Norman Borlaug, Vice President Henry Wallace, Inventor George Washington Carver, and Farmer Moses Carver. Through the stories of each, a different butterfly will appear. The book will end with a flourish of butterflies and a charge to the child that they, too, can be the boy or girl who changes the world.
