*Includes entries for maps and atlases. This report should be of interest to transit bus maintenance managers and others interested in the development of written transit bus maintenance procedures, or "practices," and the sharing of these practices with others in the transit industry. The report provides guidance on how to develop effective transit bus maintenance practices tailored to one's local operating environment. It provides seven sample practices developed using the guidance. Complementing this report is an on-line Web Board sponsored by the Transportation Research Board's Committee on Transit Fleet Maintenance. This Web Board allows transit agencies to post their maintenance practices for others to review, revise as necessary for their own operating conditions, and use. The report provides instructions on how to access the Web Board, use it to develop maintenance practices, and share these practices among transit agencies. Modified atmosphere (MA) and controlled atmosphere (CA) technologies have great potential in a wide range of applications. The increasingly global nature of food production and the increased emphasis on reducing chemical preservatives and pesticides have put the spotlight on these centuries-old technologies. Yet until now, there have been very few current resources available, and none have covered all aspects. Provides extensive background*

on the theory and application of modified and controlled atmospheres Written by top international experts in research and industry, *Modified and Controlled Atmospheres for the Storage, Transportation, and Packaging of Horticultural Commodities* explores the science and application of the modified atmosphere (MA) and the controlled atmosphere (CA). It covers all technological applications, including storage, transport, and packaging for all fruits, vegetables, and ornamentals of temperate, subtropical, and tropical origin. Tracing the historical developments of these technologies, it provides information on the ideal conditions to be used for many horticultural commodities. It also outlines the effects of MA and CA on the physiology and biochemistry of these commodities as well as on their flavor and quality. Providing the most comprehensive resource on all basic and applied aspects of these technologies, the text also reviews the vast amount of literature already written on this topic. This extensive work captures, for the first time, the entire subject of MA and CA, presenting a complete review of the technological aspects of this important development in food safety and preservation. Documents specifications, repairs, and servicing procedures for individual models, and provides information on component repair and overhaul Popular and practical, *COMMERCIAL REFRIGERATION FOR AIR CONDITIONING TECHNICIANS*, 3rd Edition, helps you apply HVAC skills to concepts in commercial refrigeration. Focused on the food service industry, chapters address how HVAC technicians service medium- and low-temperature refrigeration equipment such as walk-ins, reach-ins, refrigerated cases, and ice machines. Readings also include special features, such as insider tips from seasoned pros on installing, servicing, and troubleshooting commercial equipment. Freshly updated to include the latest industry changes, the third edition adds six full sections of content, as well as 150 helpful illustrations, pictures, and diagrams—including a step-by-step flowchart for quickly diagnosing and addressing the nine most common refrigeration problems you will see on the job. A resource to keep handy, *COMMERCIAL REFRIGERATION FOR AIR CONDITIONING TECHNICIANS*, 3rd Edition, is ideal for any technician working with commercial refrigeration today.
