This book studies the close connections between politics, culture, art, and philosophy in seventeenth-century Europe. As an emblem of this interrelationship, the author has chosen the phenomenon of the [splendid festive performance] of spectacular plays and operas given at absolutist courts in Rome, Madrid, Paris, Versailles, and Vienna between 1631 and 1668. Gods of Play fills voids in the scholarly literature on the seventeenth-century, on absolutism, on courtly theatricality, and on the philosophy of play. Aercke demonstrates that such splendid performances were not just frivolous entertainment for the courtly class but were serious activities with far-

ranging political consequences. The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.). Before tractors or steam engines arrived on the farm, horses did all the heavy work. From spring plowing to the fall harvest, the mighty draft horse powered farms across the Midwest. Relied upon to complete a multitude of tasks, including towing threshing machines and plows, hauling milk to the local cheese factory, and pulling the family buggy to church each Sunday, these animals were at the center of farm life, cementing the bond between human and horse. Horse-Drawn Days: A Century of Farming with Horses captures stories of rural life at a time when a team of horses was a vital part of the farm family. Author Jerry Apps pairs lively historic narrative with reminiscences about his

boyhood on the family farm in Wisconsin to paint a vivid picture of a bygone time. Featuring fascinating historic photos, ads, and posters, plus contemporary color photos of working horses today, *Horse-Drawn Days* evokes the majesty of these animals and illuminates the horse's role in our country's early history and our rural heritage. A sobering account of a disenfranchised American working class and important policy solutions to the nation's economic inequalities. One of the country's leading scholars on economics and social policy, Isabel Sawhill addresses the enormous divisions in American society--economic, cultural, and political--and what might be done to bridge them. Widening inequality and the loss of jobs to trade and technology has left a significant portion of the American workforce disenfranchised and skeptical of governments and corporations alike. And yet both have a role to play in improving the country for all. Sawhill argues for a policy agenda based on mainstream

values, such as family, education, and work. Although many have lost faith in government programs designed to help them, there are still trusted institutions on both the local and the federal level that can deliver better job opportunities and higher wages to those who have been left behind. At the same time, the private sector needs to reexamine how it trains and rewards employees. This book provides a clear-headed and middle-way path to a better-functioning society in which personal responsibility is honored and inclusive capitalism and more broadly shared growth are once more the norm. Nellie Callahan, matriarch of the Callahan family, is perfectly content with her life on the Callahan Ranch until handsome Beau Chandler buys the ranch next door and comes courting. Beau is smitten with the lovely Nell, but cattle rustlers, family problems, and Nell's reluctance make it almost impossible to pursue the relationship he desires. Nellie never thought she'd feel this way again about a man.

But the trauma from her past runs deep. She's been able to still the voices that have haunted her since childhood by keeping busy with her family. But her children are grown now, with families of their own, leaving her free to move into a new life for herself. How could Beau, a retired U.S. Senator, be happy with someone as flawed as she is? Will Nellie realize the truth in time, or will the rustlers put an end to her second chance at love? Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. This book is not about what might be done with straw one day. It is about what can be done with it right now on the farm. It is about today's technology, allowing decisions to be made about what to do with straw this year in order to minimize costs, minimize management problems and maximize yields and profits. It can be read cover to cover, chapter by chapter or dipped into as a reference book. Whichever way, this manual

is aimed at helping the farmer to understand the technology and do the job that has to be done - profitably. Action Plans which summarize the relevant data and ease decision-making appear at the end of each chapter. The final part is a Decision Planner which will help with tackling the job in hand, on the day. Acknowledgments Grateful thanks are given to many individuals and organizations for their assistance, support and provision of information. Special acknowledgment is made to the fine work done by ADAS and their staff who made efforts to provide a great deal of up to date data for this publication. Thanks for assistance are also given to leI Plant Protection Division and to John Deere who, through their annual Award to agricultural writers, sparked this project off by giving the award to the author in 1982.
