The Rights of Strangers May 14 2021 This study investigates the thinking of European authors from Vitoria to Kant about political justice, the global community, and the rights of strangers as one special form of interaction among individuals of divergent societies, political communities, and cultures. Taking an interdisciplinary approach, it covers historical material from a predominantly philosophical perspective, interpreting authors who have tackled problems related to the rights of strangers under the heading of international hospitality. Their analyses of the *civitas maxima* or the *societas humani generis* covered the nature of the global commonwealth. Their doctrines of natural law (*ius naturae*) were supposed to provide what we nowadays call theories of political justice. The focus of the work is on international hospitality as part of the law of nations, on its scope and justification. It follows the political ideas of Francisco de Vitoria and the Second Scholastic in the 16th century, of Alberico Gentili, Hugo Grotius, Samuel Pufendorf, Christian Wolff, Emer de Vattel, Johann Jacob Moser, and Immanuel Kant. It draws attention to the international dimension of political thought in Thomas Hobbes, John Locke, Jean-Jacques Rousseau, David Hume, Adam Smith, and others. This is predominantly a study in intellectual history which contextualizes ideas, but also emphasizes their systematic relevance.

The Routledge Companion to International Hospitality

Management Oct 31 2022 The hospitality sector is facing increasing competition and complexity over recent decades in its development towards a global industry. The strategic response to this is still that hospitality companies try to grow outside their traditional territories and domestic markets, while the expansion patterns and M&A activities of international hotel and restaurant chains reflect this phenomenon. Yet, interestingly, the strategies, concepts, and methods of internationalization as well as the managerial and organizational challenges and impacts of globalizing the hospitality business are under-researched in this industry. While the mainstream research on international management offers an abundance of information and knowledge on topics, players, trends, concepts, frameworks, or methodologies, its ability to produce viable insights for the hospitality industry is limited, as the mainstream research is taking place outside of the service sector. Specific research directions and related cases like the international dimensions of strategy, organization, marketing, sales, staffing, control, culture, and others to the hospitality industry are rarely identifiable so far. The core rationale of this book is therefore to present newest insights from research and industry in the field of international hospitality, drawing together recent scientific knowledge and state-of-the-art expertise to suggest directions for future work. It is designed to raise awareness on the international factors influencing the strategy and performance of hospitality organizations, while analyzing and discussing the present and future challenges for hospitality firms going or being international. This book will provide a comprehensive overview and deeper understanding of trends and issues to researchers, practitioners, and students by showing how to master current and future challenges when entering and competing in the global hospitality industry.
