The Green Book Jul 16 2021 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before

significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Hedge Fund Activism Oct 31 2022 Hedge Fund Activism begins with a brief outline of the research literature and describes datasets on hedge fund activism.

Creditworthiness and 'Responsible Credit' Nov 27 2019 In this comparative study in US and EU law, Noah Vardi questions whether there is a legally enforceable duty to lend and borrow credit in a "responsible" manner and clarifies the associated notion of "creditworthiness."

Consumer Credit and the American Economy Feb 08 2021 This article provides an introduction to a law review symposium by the Journal of Law, Economics, and Policy on our book (co-authored with Michael E. Staten), *Consumer Credit and the American*

Economy (Oxford 2014). The conference, held November 2014, collects several articles responding to and building on the research agenda laid out by our book. For those who have not read the book, this article is intended to summarize several of the main themes of the book, including discussion of economic models of consumer credit usage, trends in consumer credit usage over time, the use of high-cost credit, and behavioral economics.

Democracy Denied Sep 25 2019 Democracy Denied by Americans for Prosperity vice president Phil Kerpen is a guide to understanding and defeating the radical agenda that President Barack Obama is implementing by unilateral regulatory action through his agencies and czars. Democracy Denied exposes the Obama administration's agenda that disregards the American people, Congress, and the U.S. Constitution—and offers a plan of action to stop it.

European Regulatory Private Law Dec 21 2021 The working paper collects the research presented in the second annual external workshop of the ERPL Project that took place on 16 and 17 May 2013 at the EUI in

Florence. The second year of the project was devoted to the collection of empirical evidence in the various sub-projects, as well as in further elaboration of the theoretical and conceptual parameters that frame the project research. The theoretical parts of the working paper collects contributions on the relation between private autonomy and regulation (in Part I) as well as on the transformation of private law, including the drivers of the transformation in the public/private divide that in turn affects the purview of private law, as well as the transformation in the form and function of contract law and tortious liability (in Part III). The empirical part of the working paper contains contributions investigating the topics of remedies, standardisation of services, and telecommunications, analysed from the perspective of the parameters of hybridization, convergence and self-sufficiency, as elaborated in the previous working paper of the project LAW 2012/31

ERPL-01.

Corporate Behavior and Sustainability Mar 31 2020

Companies can no longer expect to engage in dubious or unethical corporate behaviour without risking their reputation and damaging, perhaps irrevocably, their market position. Irresponsible corporate behavior not only deprives shareholders of long-term returns but also ultimately imposes a cost on society as a whole. Sustainable business is about ensuring that entities contribute toward positive social, environmental, and economic outcomes. Bad business behaviour is costly for stakeholders, for markets, for society, and the economy alike. To ensure that a company behaves well, the buy-in of the leadership team is crucial. The full commitment of the board of directors, in conjunction with the senior managers of the organization, is required if an organization is to be socially responsible. In this sense, leadership does not reside with an individual (the CEO) within the organization but with all of

those at the apex of corporate power and control. Effective change management requires enlightened and capable leadership to instigate and drive the process of embedding a sustainable and socially responsible corporate philosophy and culture that supports good business decision-making. A profound understanding of the requirements of such a leadership process will help corporate managers become highly effective change agents. Governance will be the main driver of this change. For the economy and financial markets to become sustainable and resilient, radical changes in corporate leadership need to take place. Integrated reporting, government regulation, and international standards will all be important factors in bringing about this change. As well as understanding the effects of corporate behavior on financial markets, such an understanding is also now imperative in relation to the social and environmental

contexts.

The Legal Construction of Personal Work Relations

May 14 2021 This book explores the conceptual framework of European employment law, focusing on understanding the law's construction of employment relationships. The book draws on extensive comparative research of the legal architecture of employment relations in national legal systems and EU law to analyse the traditional model of the contract of employment and the difficulties of using the traditional model to frame modern working relationships. The authors then present a new model of the foundations of employment relationships, based on the concept of a personal work nexus, and explore the potential of their model to shape the future development of employment law. Throughout the book, the authors analyse the interaction of domestic and EU employment law, and discuss the possibility of future legal harmonisation in the area.

They conclude by exploring the potential for a common framework for European employment law, in the context of broader debates surrounding the harmonisation of European private law.

JPRI Working Paper Jan 22 2022

Evolution of Competition Laws and their Enforcement Aug 29 2022 This edited volume identifies the various country specific factors that warrant changes in the design and implementation of competition laws. The book covers case studies of nine countries of differing sizes and at varying stages of economic development, that have at one stage or another repealed extant competition laws for new ones, and seeks to examine the motivations and contexts under which this was done. The countries examined include the Czech Republic,

Hungary, India, Ireland, Poland, Serbia, South Africa, Tanzania and the UK. Tracing the evolution of competition regimes in the countries covered, the book provides lessons for countries still in the process of forming their competition regimes. The contributions show that the road to strong competition regimes is seldom smooth, and that social, economic and political factors in the country hugely impact on the pace and effectiveness of competition reforms. The volume also addresses the issue of when the development of competition policies and laws can be seen to be in conflict with national development strategies.

Working Papers for the National Conference on Legal Specialization, June 13-14, 1975 Aug 05 2020
Open Data White Paper Oct 26 2019 This White Paper sets out clearly how the UK will continue to unlock and seize the benefits of data sharing in the future in a responsible way.

Firstly by ensuring equality in access to data; secondly in building greater trust in public data; and thirdly by ensuring that public services are more personalised and efficient by being smarter with the data public bodies hold. The UK is currently co-chairing the Open Government Partnership of 55 governments whose theme is 'Transparency drives prosperity' with the belief that opening up data will empower citizens, foster innovation and reform public services. It is also, therefore, about how others participate. About businesses and organisations becoming more transparent themselves and pushing data into the public domain and individuals taking that data and using it to make better decisions or press for different types of services.

International Law in Financial Regulation and Monetary Affairs Nov 19 2021 Analysing the emerging international legal framework governing financial institutions and markets, including monetary policies and

monetary regulation, this book addresses the cross border issues that arise within this area. It highlights the lack of formal international law present, and shows how this contributed to the global financial crisis.

Legal Strategies Jun 14 2021

Far from regarding the law as supreme, corporations approach law as an element of executive thought and action aimed at optimizing competitiveness. The objective of this book is to identify, explore and define corporate legal strategies that seek advantage in the opportunities revealed when the Law is perceived as a resource to be mobilized and aligned with the firm's business and economic agendas.

Law and Finance Feb 20 2022

Although it is widely acknowledged that the benefits of corporate governance reform could be substantial, systematic evidence on such

reforms is scant. We both document and evaluate a contemporary corporate governance reform by constructing 18 measures of shareholder and creditor protection for Finland for the period 1980-2000. The measures reveal that shareholder protection has been strengthened whereas creditor protection has been weakened. We also demonstrate how the reform is consistent with a reorganisation of the Finnish financial market in which a bank-centred financial system shifted from relationship-based debt finance towards increasing dominance by the stock market. We find evidence that the development of shareholder protection has been a driver of the reorganisation, whereas the changes in creditor protection have mirrored market developments.
