nursing students prepare to take the licensing examination. The book blends critical content review in an easy-to-follow and bulleted format, pharmacology tables that summarize core medication information, and thousands of questions covering all the Client Need categories of NCLEX and the major content areas of pre-licensure programs. The book is divided into seven parts. Part I explains the basics of NCLEX test construction and gives ideas to students about how they should prepare. Parts II to V are designed to support the four major content areas of pre-licensure programs: medical-surgical, psychiatric/mental health, maternity, and pediatric nursing. Within these four sections, each begins with a bulleted content review of essential concepts, followed by multiple questions and answers in a side-by-side format. Part VI, "Issues in Nursing," emphasizes content areas that do not easily fall in any of the other sections: management/supervision and ethical/legal issues. Part VII consists of two comprehensive tests. One contains 75 questions (the minimum number of items any student taking the NCLEX RN will receive) and the other contains 265 questions (the maximum number of items any student taking the NCLEX RN will receive). The product offers more than 3,000 questions that prompt active learning and higher-order thinking. The questions align with the National Council of State Boards of Nursing (NCSBN) 2019 RN test plan and are written in the style used on the licensing examination. Other
