Enhancing Healthcare and Rehabilitation Aug 29 2022 Summary Description This book is primarily a celebration of the qualitative work undertaken internationally by a number of experienced researchers. It also focuses on developing the use of qualitative research for health and rehabilitative practitioners by recognizing its value methodologically and empirically. We find that the very nature of qualitative research offers an array of opportunities for researchers in being able to understand the social world around us. Further, through experience and discussion, this book identifies the multifaceted use of qualitative methods in the healthcare and rehabilitative setting. This book touches on the role of the researcher, the participants involved, and the research environment. In short, we see how these three central elements can affect the nature of qualitative work in attempts to offer originality. This text speaks to a number of audiences. Students who are writing undergraduate dissertations and research proposals, they may find the myriad of examples stimulating and may support the rationale for methodological decisions in their own work. For academics, practitioners, and prospective qualitative researchers this book also aims to demonstrate an array of opportunism in the field of qualitative research and how they may resonate with arguments proffered. It is anticipated that readers will find this collection of qualitative examples not only useful for informing their own research, but we also hope to enlighten new discussions and arguments regarding both methodological and empirical use of qualitative work internationally. Features Encompasses the importance of qualitative research and how it can be used to facilitate healthcare and rehabilitation across a wide range of health conditions. Evaluates empirical data whilst critically applying it to contemporary practices. Provides readers with an overview with future directions and influence policy makers in order to develop practice. Focuses on an array of health conditions that can affect groups of the population, coincided with life issues and the care and family support received. Offers innovative methodological insights for prospective researchers in order to add to the existing evidence base. may find the myriad of examples stimulating and may support the rationale for methodological decisions in their own work. [Rehabilitation in Cancer Care](#) Sep 25 2019 Rehabilitation in Cancer Care is an essential clinical resource for all Allied Health Professionals working within or entering this specialist area. It provides practical guidance for the rehabilitation of people with cancer or those receiving palliative care. As well as explaining the key skills required at every stage of the cancer journey, the book specifically offers advice on diagnosis, treatment, management and effective interventions. Furthermore the role of each member of the interdisciplinary team is clearly explained at each stage, as is the importance of teamwork and holistic care. Section 1 introduces the reader to the rationale for the rehabilitation of people with cancer or those receiving palliative care, Section 2 looks at the multi-professional management of common cancers and Section 3 looks at symptom management.

Practical Psychology in Medical Rehabilitation Dec 09 2020 This easy-access guide summarizes the dynamic specialty of rehabilitation psychology, focusing on real-world practice in the medical setting. It begins by placing readers at the frontlines of practice with a solid foundation for gathering information and communicating effectively with patients, families, and staff. The book's topics run a wide gamut of patient conditions (neurological, musculoskeletal, cardiovascular), related problems (sleep and fatigue issues, depression) and practitioner responses (encouraging coping and compliance, pediatric and geriatric considerations). Models of disability and adaptation, review of competency concerns, and guidelines for group and individual therapy offer evidence-based insights for helping patients manage their health conditions, benefit from rehabilitation interventions, and prepare for their post-rehabilitation lives and activities. Coverage spotlights these core areas: ·Basics and biopsychosocial practicalities, from behavioral medicine and psychopharmacology to ethical and forensic issues. ·Populations, problems, and procedures, including stroke, TBI, substance abuse, transplants, and severe mental illness. ·Assessment and practical interventions such as pain, anxiety, cognitive functioning, and more. ·Consultation, advocacy, and interdisciplinary teams. ·Practice management, administration, and professional self-care. ·Research, technology, and program evaluation. Practical Psychology in Medical Rehabilitation is an essential professional development tool for novice (and a refresher for veteran) psychologists and neuropsychologists, as well as rehabilitation physicians, nurses, therapists, psychiatrists, and social workers. It presents in depth both the hallmarks of the specialty and the nuts and bolts of being a valuable team player in a medical setting.

Handbook of Rehabilitation in Older Adults Oct 07 2020 This book discusses the state of the research and cutting-edge practice with regard to chronic illnesses and rehabilitation in older adults. It emphasizes biopsychosocial and culturally appropriate rehabilitation approaches to reduce the degree of disability and maximize independence in the activities of daily living among the burgeoning aging population. Organized in four sections—Introduction and Overview, Major Illnesses and Problems in Aging Populations, Evaluation of Functional Rehabilitation Approaches for Aging Populations, and Future Clinical Research Needs—the book includes chapters on the “graying” of the West with implications for increased chronic illnesses and disabilities; a review of biopsychosocial rehabilitation approaches; important “aging” issues such as slips-and-falls, musculoskeletal pain, chronic disabling conditions such as cancer and cardiovascular disease, and work-related factors to maintain work engagement in older workers. The US Census Bureau projects that by the year 2030, about 20% of the U.S. population will be 65 or older, contributing to the increased concern about healthcare and rehabilitation issues among older adults. /div This work will be of interest to healthcare, rehabilitation, vocational, human resource and disability management professionals, policy makers as well as researchers in areas of aging, gerontology, chronic illness, disability, rehabilitation, social work, medicine and psychology.

Ergonomics in Health Care and Rehabilitation May 26 2022 This unique book teaches therapists how to use ergonomics to optimize human performance and improve patient health. It explains what recommendations should be made to industry to promote healthy work habits and decrease the incidence of musculoskeletal injuries and discusses proper body mechanics, work simplification techniques, and recommendations for ergonomic equipment. * -Defines two new practice areas: health care ergonomics and rehabilitation ergonomics * - Combines theory and practice * - Includes [real life] case studies

Concepts of Rehabilitation for the Management of Common Health Problems Mar 24 2022 Although there is broad agreement on the importance of rehabilitation and the need to improve occupational health and vocational rehabilitation in the UK, there is considerable uncertainty about what 'rehabilitation' is, and about its cost-effectiveness, particularly for the common health problems that cause most long-term disability and incapacity. This paper seeks to develop a theoretical and conceptual basis for the rehabilitation of common health problems. Chapters include: traditional rehabilitation and the need for a different approach; illness, disability and incapacity for work; the biopsychosocial model and framework of disability; obstacles to recovery and return to work; clinical and occupational management of common health problems; personal responsibility and motivation; and rehabilitation in a social security context.

Rehabilitation Counselling in Physical and Mental Health Mar 12 2021 Individuals experiencing rehabilitation are subject to profound life adjustments, and the contributors to this book explore how the relationship between counsellor and client can be a source of support during that time, drawing out the historical background and theoretical implications of their work and making recommendations for good practice.

Sea Turtle Health & Rehabilitation Apr 12 2021 The first-ever comprehensive book on sea turtle husbandry, health, medicine, and surgery, this full-color guide presents extensive information for the proper rescue, evaluation, care, and rehabilitation of sick and injured sea turtles at every stage of life.

A Comprehensive Guide to Rehabilitation of the Older Patient E-Book Jun 26 2022 This book will help all health professionals involved in the rehabilitation of older people to provide their patients with the highest possible quality of life and autonomy. Expanded and rewritten by a diverse team of authors, the text is suitable for doctors in all specialties that see older patients, as well as nurses, physiotherapists, occupational therapists, psychologists, dietitians, speech and language therapists/pathologists, physician associates/assistants, healthcare assistants, and many others including patients, family members and students. The book is written in an accessible, no-jargon style and provides a patient-centred perspective on recent advances in the field of rehabilitation – an increasingly important aspect of care for older people. Clear explanations of relevant concepts: ageing, frailty, comprehensive assessment, rehabilitation Broad coverage of all aspects of rehabilitation including different settings Explanations of input from multiple health professionals Problem-based section that highlights solutions to common issues during rehabilitation Specialty-specific areas of rehabilitation such as stroke rehabilitation, cancer rehabilitation, post-operative rehabilitation, trauma, rehabilitation in the community Practical section explaining how to plan discharge safely, run a care planning meeting, organize home supports, continue rehabilitation at home Evidence-based but accessible writing, complemented by practical clinical wisdom Aimed at a broader audience – applicable to all health professionals who see older patients Resources for patients and their caregivers Multiple-choice questions to test knowledge

Disability Prevention and Rehabilitation in Primary Health Care: A Guide for District Health and Rehabilitation Managers Jan 22 2022 Describes a step wise process of assessment, planning, and action that can be used to improve disability prevention and rehabilitation within the context of primary health care. Aware of the constraints often faced in district level services, the guide concentrates on measures that can be taken without the need for additional staff and without creating an excessive burden on time. Most activities described can be completed in the course of a one-

day workshop. Throughout, numerous practical examples are used to illustrate how the process actually works in practice and the types of community problems it can address. The guide, which is intended for district health and rehabilitation managers, has six chapters. The first explains how to use a one-day workshop to launch a district initiative for disability prevention and rehabilitation. Chapter two, on information gathering, explains pertinent sources of readily available information, and offers advice on how to use questionnaires and interviews to gather additional information. A time frame of six months is suggested for this research phase. Chapter three explains how to involve the community in the identification of problems and the planning of action. The remaining chapters cover assessment and planning at the district health level, monitoring and supervision of the current system for disability prevention and rehabilitation, and collaboration with other sectors, such as education, social services and labor, which can contribute to disability prevention and rehabilitation.

Assessment in Rehabilitation and Health Sep 05 2020 Assessment in Rehabilitation and Health is the first and only text tailored specifically for students seeking a structured foundation of knowledge of tests and related assessment practices commonly used by health professionals in their various fields. While other textbooks commonly used in this area of study often offer a broader and more sweeping look at assessment practices and theories, Assessment in Rehabilitation and Health focuses closely on the standardized and clinical methods of health assessment in regards to rehabilitation counseling, communication and speech disorders, occupational therapy, neuropsychology, physiotherapy, and physical medicine. Each chapter is structured using the common framework provided by the World Health Organization's International Classification of Disability, Functioning and Health (ICF). This framework, which is considered the gold standard by numerous health institutions around the world in regards to concepts and practices in rehabilitation and health, allows students to gain knowledge and learn practices that are consistent with this widely accepted and highly regarded ICF model. These chapters not only follow this framework, but are also all organized to include the following topics: professional and legal definitions and theories that form the foundation for assessment methods; a brief history of the research and practice methods pertinent to each chapter topic; a listing of assessment methods commonly used in rehabilitation and health related practices; and a discussion of cultural, legislative, and professional issues that impact the use of the specific assessment methods.

Rehabilitation for Work Matters Aug 05 2020 A working understanding of medical ethics is becoming ever more important to all practising doctors. There are many ethical issues which present often unexpectedly to healthcare professionals which can seem impossible to resolve. This is an introductory text for everyday general practice. Key issues and relevant legal aspects are illustrated with examples and case histories and the book is structured so particular topics can be found with ease. For added benefit chapters have pointers for further reflection and analysis references to journal articles and useful reading lists. The book can be used as a resource for group discussion or by individual general practitioners including GP registrars and their trainers.

Virtual Reality in Health and Rehabilitation Jan 02 2023 This edited book focuses on the role and use of VR for healthcare professions in both health and rehabilitation settings. It is also offers future trends of other emerging technology within medicine and allied health professions. This text draws on expertise of leading medical practitioners and researchers who utilise such VR technologies in their practices to enhance patient/service user outcomes. Research and practical evidence is presented with a strong applied emphasis to further enhance the use VR technologies within the community, the hospital and in education environment(s). The book may also be used to influence policymakers on how healthcare delivery is offered.

Sleep and Rehabilitation May 14 2021 Sleep and Rehabilitation: A Guide for Health Professionals is a concise reference for the health professional looking to further understand sleep and how sleep science may impact particular areas of various rehabilitation disciplines. Dr. Julie M. Hereford and her contributors present Sleep and Rehabilitation: A Guide for Health Professionals in an easy-to-read manner by dividing the text into four main sections. The first section provides a review of the basic scientific understanding of sleep. While there are many other publications that present a basic scientific understanding of sleep, Sleep and Rehabilitation systematically gears this information toward the rehabilitation professional with commonly used terminology, descriptions of sleep architecture, and information concerning sleep hygiene. The middle sections of Sleep and Rehabilitation describe disordered sleep and how it pertains to patients seen in the rehabilitation setting. It guides the health professional to recognize the manifestations and consequences of disordered sleep and teaches the rehabilitation professional how to interpret a sleep study in order to provide guidance in clinical decision making. Finally, the last section of Sleep and Rehabilitation provides the ever-important practical application of the theoretical principles in sleep rehabilitation. Features include: · Discussion on the science of polysomnography · Sleep and sleep dysfunction from a rehabilitation perspective · Sleep dysfunction as it relates to the clinical needs of a patient undergoing the rehabilitation process · Discussion on the particular concerns that sleep and sleep dysfunction can hold for rehabilitation patients and issues to be addressed by the provider · Presentation of unique issues that disordered sleep may present in the rehabilitation process such as on pain, pain management, motor learning, and memory and performance enhancement · Tools to assess quality and quantity of a patient's sleep · Discussion on methods in which sleep may be manipulated in order to optimize a patient's physical performance Sleep and Rehabilitation: A Guide for Health Professionals is a one-of-a-kind reference that will help the health professional incorporate the science of sleep into the rehabilitation process.

Teamwork in Medical Rehabilitation Feb 20 2022 Good teamwork ensures the close collaboration and coordination between professional groups and across disciplinary boundaries. This is particularly important in healthcare centres and clinics admitting complicated patient cases, but contrary to what many healthcare organisations seem to believe, effective teamwork does not happen automatically. It needs to be successfully trained and practiced. Teamwork in Medical Rehabilitation provides a guide to efficient teamwork in professional healthcare. Showcasing the practice of medical rehabilitation in Sweden, the book describes how to create, develop, nourish and organise a team. Medical rehabilitation in Sweden is a discipline filled by not only doctors and nurses, but also physiotherapists, occupational therapists, psychologists, social workers, speech therapists and dieticians. Using these multi-professional teams as clinical case studies, the book contains many practical examples from different rehabilitation care areas. This book will prove to be invaluable to healthcare professionals and students as effective collaboration is essential to good clinical outcomes. Managers will also find this a worthy read thanks to its understanding of how working conditions affect good teamwork.

Acute Medical Rehabilitation Mar 31 2020

Communication and Clinical Effectiveness in Rehabilitation E-Book Feb 08 2021 Incorporating a patient-focused perspective on communication and health care, this new title for physical and

occupational therapists and students provides practical strategies for effective communication with both colleagues and patients. Written in a straightforward, easy-to-understand style, it offers a multidisciplinary, evidence-based approach and an emphasis on reflective practice, making it a timely and useful resource for today's readers. Discusses strategies for communicating with both colleagues and patients Examines the evidence for the importance of effective communication in enhancing clinical effectiveness Contains reflective exercises for self-awareness of personal communication skills and difficulties Provides case studies that allow the reader to analyze a range of realistic communication problems Includes research-based evidence throughout

Enhancing Healthcare and Rehabilitation Sep 29 2022 Summary Description This book is primarily a celebration of the qualitative work undertaken internationally by a number of experienced researchers. It also focuses on developing the use of qualitative research for health and rehabilitative practitioners by recognizing its value methodologically and empirically. We find that the very nature of qualitative research offers an array of opportunities for researchers in being able to understand the social world around us. Further, through experience and discussion, this book identifies the multifaceted use of qualitative methods in the healthcare and rehabilitative setting. This book touches on the role of the researcher, the participants involved, and the research environment. In short, we see how these three central elements can affect the nature of qualitative work in attempts to offer originality. This text speaks to a number of audiences. Students who are writing undergraduate dissertations and research proposals, they may find the myriad of examples stimulating and may support the rationale for methodological decisions in their own work. For academics, practitioners, and prospective qualitative researchers this book also aims to demonstrate an array of opportunism in the field of qualitative research and how they may resonate with arguments proffered. It is anticipated that readers will find this collection of qualitative examples not only useful for informing their own research, but we also hope to enlighten new discussions and arguments regarding both methodological and empirical use of qualitative work internationally. Features Encompasses the importance of qualitative research and how it can be used to facilitate healthcare and rehabilitation across a wide range of health conditions. Evaluates empirical data whilst critically applying it to contemporary practices. Provides readers with an overview with future directions and influence policy makers in order to develop practice. Focuses on an array of health conditions that can affect groups of the population, coincided with life issues and the care and family support received. Offers innovative methodological insights for prospective researchers in order to add to the existing evidence base.

Collaborative capacity development to complement stroke rehabilitation in Africa Dec 21 2021 This scholarly book focuses on stroke in Africa. Stroke is a leading cause of disability among adults of all ages, contributing significantly to health care costs related to long term implications, particularly if rehabilitation is sub-optimal. Given the burden of stroke in Africa, there is a need for a book that focuses on functioning African stroke survivors and the implications for rehabilitation within the African context. In addition, there is a need to progress with contextualised, person-centred, evidence-based guidance for the rehabilitation of people with stroke in Africa, thereby enabling them to lead socially and economically meaningful lives. The research incorporated in the book used a range of primary and secondary methodological approaches (scoping reviews, systematic reviews, meta-analyses, descriptive studies, surveys, health economics, and clinical practice guideline methodology) to shed new insights into African-centred issues and strategies to optimise function post-stroke.

Zero Effort Technologies Jul 04 2020 This book introduces zero-effort technologies (ZETs), an emerging class of technology that requires little or no effort from the people who use it. ZETs use advanced techniques, such as computer vision, sensor fusion, decision-making and planning, and machine learning to autonomously operate through the collection, analysis, and application of data about the user and his/her context. This book gives an overview of ZETs, presents concepts in the development of pervasive intelligent technologies and environments for health and rehabilitation, along with an in-depth discussion of the design principles that this approach entails. The book concludes with a discussion of specific ZETs that have applied these design principles with the goal of ensuring the safety and well-being of the people who use them, such as older adults with dementia and provides thoughts regarding future directions of the field. Table of Contents: Lecture Overview / Introduction to Zero Effort Technologies / Designing ZETs / Building and Evaluating ZETs / Examples of ZETs / Conclusions and Future Directions

Interprofessional Rehabilitation Oct 19 2021 Interprofessional Rehabilitation: a Person-Centred Approach is a concise and readable introduction to the principles and practice of a person-centred interprofessional approach to rehabilitation, based upon a firm scientific evidence base. Written by a multi-contributor team of specialists in physiotherapy, occupational therapy, nursing, psychology and rehabilitation medicine, this text draws together common themes that cut across the different professional groups and the spectrum of health conditions requiring rehabilitation, and sets out a model of practice that is tailored to the specific needs of the client. Showing interprofessionalism at work in a range of clinical contexts, the book argues that effective rehabilitation is best conducted by well-integrated teams of specialists working in an interdisciplinary way, with the client or patient actively involved in all stages of the process. This book will be essential reading for students preparing for practice in an increasingly interprofessional environment, and will be of interest to any health care practitioner keen to understand how an integrated approach to rehabilitation can benefit their clients.

Occupational Health and Rehabilitation Dec 01 2022 Sustaining a healthy and productive work environment for employees with health issues and work disabilities or those returning to work after sick leave may present a challenge to employers. This publication offers unique insights into occupational health and rehabilitation, covering international perspectives as well as a variety of health-related disciplines. Policymakers, employers, employees, researchers and students will find new approaches to questions of how to maintain work ability and health in the workplace: Which motives influence strategic planning in the healthcare and employment sector? How can the return of employees after sick leave be facilitated? How best to implement innovations while keeping the workplace safe and healthy? And how does occupational rehabilitation benefit from evidence-based knowledge transfer? Contents• Work Ability and Work Disability• Return to Work• Work and Health• Work and Innovation

Disease Control Priorities, Third Edition (Volume 9) Jul 28 2022 As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes

fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

On-Site Occupational Health and Rehabilitation Aug 17 2021 On-Site Occupational Health and Rehabilitation: A Model for the Manufacturing and Service Industries describes how to establish an on-site occupational health program, from a sample of a request for proposal response, cost-savings reports, and clinical protocols, evaluations, and treatments to corporate awareness of workers' compensation, lost work-time situations, and applications for cost-effective solutions. Contains procedures and guidelines developed by the author for prestigious firms such as Ford Motor Co., General Motors Co., Bank One Corp., The Detroit Newspapers, J&L Specialty Steel Inc., Henry Ford Health System, and PepsiCo, Inc.! Exploring diagnostic mix, clinic size, on-site industrial rehabilitation program benefits, prevention medicine, and wellness and fitness strategies, On-Site Occupational Health and Rehabilitation: A Model for the Manufacturing and Service Industries illustrates how individual corporate environments can adapt to form a patient-centered, high-trust, cooperative, and informed workplace discusses the interrelationship between clinical evaluation and treatment, ADA compliance, work-site ergonomics, on-site job analysis, and placement coordination highlights crucial factors that will determine the success of an on-site medical rehabilitation program offers a prescription for a healthy, safe work environment and more! Including concise at-a-glance summaries of all rehabilitation and health services, On-Site Occupational Health and Rehabilitation: A Model for the Manufacturing and Service Industries is an invaluable resource for all occupational safety and health, occupational and environmental, primary care, family practice, and emergency room physicians; neurologists, physiatrists, and internists; physical and occupational therapists and kinesiotherapists; athletic trainers; exercise physiologists, ergonomists, and applied biomechanists; and upper-level undergraduate, graduate, and medical school students in these disciplines.

Exercise in Health and Disease Feb 29 2020 Focuses on exercise and fitness for both healthy individuals and those with conditions such as cardiovascular disease and obesity. The text discusses basic etiology and pathophysiology and details the role of exercise in prevention and rehabilitation. Emphasis is on prescribing effective exercise programs. Presents discussions on etiology of disease, principles of exercise prescription, value of exercise, fitness measurement and more! Includes numerous illustrations and references.

Rehabilitation and Health Assessment Sep 17 2021 " Mpofu and Oakland have given us a volume of exceptional clarity, depth, and breadth, one whose utility extends well beyond rehabilitation psychology. As such, Rehabilitation and Health Assessment: Applying ICF Guidelines will be an outstanding text for courses in assessment at all levels of professional preparation and will serve as a valued reference source for future research in a wide variety of fields. --PscCRITIQUES Instructor's Guide Available to Qualified Instructors! The World Health Organization's ICF (International Classification of Functioning, Disability, and Health) has undergone dramatic changes in the past decade, requiring that disability be understood in light of contextual, social, and personal factors. This examination of ICF guidelines provides a comprehensive survey of assessment tools, emerging technologies, and procedures necessary for personalizing rehabilitation and health care interventions. Editors Mpofu and Oakland have gathered an international team of experts to set forth this masterful volume-dedicated to helping students, researchers, and practitioners advance their understanding of test use, assessment, and measurement, using the framework and philosophy presented in the ICF model. With this book, readers will learn how to apply ICF guidelines effectively, by expanding their knowledge of: Professional issues, such as ethical quandaries, cultural and diversity considerations, and working with children and youth Cutting-edge assessment technologies, such as virtual world tools, functional magnetic resonance imaging, and pre-scored health status instruments Assessments of patients' adaptation to disability, such as measures of pain, forgiveness, self-efficacy and resilience, spirituality, and more Measures of participation, including physical and functional performance, community integration, sexual functioning, and recreational activities "

The Making of Rehabilitation Jun 14 2021 Focusing on the history of one medical field—rehabilitation medicine—this book provides the first systematic analysis of the underlying forces that shape medical specialization, challenging traditional explanations of occupational specialization.

Rehabilitation Interventions Nov 07 2020 This volume - one of eight in the cross-disciplinary and issues-based series in The SAGE Reference Series on Disability - explores issues involving rehabilitation interventions and therapies.

Telerehabilitation, E-Book Jan 10 2021 Offering significant benefits to both healthcare providers and patients, telerehabilitation is a key component in the future of rehabilitation care.

Telerehabilitation: Principles and Practice provides expert information from experienced practitioners in the field, covering the wide range of patients seen in a rehabilitation medical practice or a hospital-based system. It provides quick access to information on common rehabilitation diagnoses and practices and how you can best use telerehabilitation to provide timely, effective care to every patient. Clearly explains the benefits and utility of telerehabilitation for improving access to care and outcomes for various patient populations. Uses a reader-friendly format based on diagnosis of specific disorders and common problems. Covers telerehabilitation for spinal cord injury, stroke, and cancer rehabilitation, amongst other diagnoses. Discusses key topics in telerehabilitation such as musculoskeletal concerns, integrative health, physical and occupational therapy. Features discussions of the use of telerehabilitation for care of psychological, bladder, bowel, and sexual concerns. Ideal for telemedicine professionals, physiatrists in practice or residency administrators, as well as physical and occupational therapists.

Burn Care and Rehabilitation May 02 2020 Aimed at physical therapists and students of rehabilitation, this series exposes the reader to today's most challenging concepts in rehabilitation in a problem-solving format. The emphasis is on clinical decision making. The intent of the series is to promote a clear grasp of concepts in clinical practice through an analytical perspective that will complement the academic or workshop presentations in the field of rehabilitation therapy.

Resistance Training for Health and Rehabilitation Oct 31 2022 This text addresses the expanding role of resistance training for health, disease prevention and rehabilitation. It presents a clear and sound rationale for including resistance training as a health benefit, pointing out the areas in which it helps.

Community-based Rehabilitation Nov 27 2019 Volume numbers determined from Scope of the guidelines, p. 12-13.

Telerehabilitation, E-Book Oct 26 2019 Offering significant benefits to both healthcare providers and patients, telerehabilitation is a key component in the future of rehabilitation care. *Telerehabilitation: Principles and Practice* provides expert information from experienced practitioners in the field, covering the wide range of patients seen in a rehabilitation medical practice or a hospital-based system. It provides quick access to information on common rehabilitation diagnoses and practices and how you can best use telerehabilitation to provide timely, effective care to every patient. Clearly explains the benefits and utility of telerehabilitation for improving access to care and outcomes for various patient populations. Uses a reader-friendly format based on diagnosis of specific disorders and common problems. Covers telerehabilitation for spinal cord injury, stroke, and cancer rehabilitation, amongst other diagnoses. Discusses key topics in telerehabilitation such as musculoskeletal concerns, integrative health, physical and occupational therapy. Features discussions of the use of telerehabilitation for care of psychological, bladder, bowel, and sexual concerns. Ideal for telemedicine professionals, physiatrists in practice or residency administrators, as well as physical and occupational therapists.

Integrative Rehabilitation Practice Jun 02 2020 This multi-contributed book provides a detailed exploration of mind-body integrated, whole-person rehabilitation. *Integrative Rehabilitation Practice* goes beyond the treatment of symptoms to explore all levels, roots, and possible contributing factors to an ill health experience, and this book covers both the theoretical foundations of IRP and applications to practice in a variety of fields.

New Dynamics of Disability and Rehabilitation Dec 29 2019 This collection provides a broad coverage of recent changes in medical and vocational rehabilitation in Northern Europe. It presents analyses that cut across health sciences, medical sociology, disability studies and comparative welfare state research. Through this interdisciplinary perspective, the book explores the changing roles of patients, caregivers, professionals and institutions, and the wider implications of these changes for social inequalities in health. What obstacles do different groups of patients encounter when negotiating the complex chains of medical and vocational services? Who decides regarding references to specialized treatments, and the provision of comprehensive and coordinated services, and different types of benefits and material support? What is the importance of the resources that patients and caregivers bring to bear in the rehabilitation process?

Home Health and Rehabilitation Nov 19 2021 -- Three new chapters added: Ethical Considerations in Home Care (ch. 11); Documentation in Home Health (ch. 14); and Reimbursement (ch. 15)-- Contributions by both OT and PT professionals give the book a unique focus on the therapist's role in home care-- Each chapter combines theoretical and practical information and is designed to help the practitioner or future practitioner design programs for total client care-- Chapter on the decision-making process focuses on the role of clinical reasoning in home health care-- Individual chapters address specific OT/PT issues such as assessment and function, therapeutic exercise, mobility problems, adapting the home environment, medication management, and documentation and reimbursement-- Cultural differences and their effect on the therapist/client relationship are explored

Chronic Disease and Rehabilitation Jan 28 2020

Handbook of Health and Rehabilitation Psychology Apr 24 2022 This timely handbook disseminates current, practical information relevant to the changes in health care practice and addresses logistical issues vital to the future of the industry. Chapters provide up-to-date information that will aid practitioners and researchers in both clinical treatments and research initiatives. Renowned experts offer insights into critical topics such as: how to better market health care services; how to utilize technological advances to enhance the efficiency of clinical practice; current issues such as HIV, aging, computers, marketing, and managed mental health; and assessment of specific disorders. Innovative ways for clinicians to improve their practices are included.

The Place of medical rehabilitation in the organisation of health services Aug 24 2019
