"No mission too difficult, no sacrifice too great-Duty First!" For almost a century, from the Western Front of World War I to the deserts of Iraq, this motto has spurred the soldiers who wear the shoulder patch bearing the Big Red One. In this first comprehensive history of America's 1st Infantry Division, James Scott Wheeler chronicles its major combat engagements and peacetime duties during its legendary service to the nation. The oldest continuously serving division in the U.S. Army, the "Fighting First" has consistently played a crucial role in America's foreign wars. It was the first American division to see combat and achieve victory in World War I and set the standard for discipline, training, endurance, and tactical innovation. One of the few intact divisions between the wars, it was the first army unit to train for amphibious warfare. During World War II, the First Division spearheaded the invasions of North Africa and Sicily before leading the Normandy invasion at Omaha Beach and fighting on through the Hurtgen Forest, the Battle of the Bulge, the Ruhr Pocket, and deep into Germany. By war's end, it had developed successful combined-arms, regimental combat teams and made advances in night operations. Wheeler describes the First Division's critical role in postwar Germany and as the only combat division in Europe during the early Cold War. After returning to the United States at Fort Riley, Kansas, the division fought valiantly in Vietnam for five trying years, successfully protecting Saigon from major infiltration along Highway 13 while pioneering "air-mobile" operations. It led the liberation of Kuwait in Desert Storm and kept an uneasy peace in Bosnia and Kosovo. Along the way, Wheeler illuminates the division's organizational evolution, its consistently remarkable commanders and leaders, and its equally remarkable soldiers. Meticulously detailed and engagingly written, The Big Red One nimbly combines historical narrative with astute analysis of the unit's successes and failures, so that its story reflects the larger chronicle of America's military experience over the past century. Richmond Redeemed pioneered study of Civil War Petersburg. The original (and long out of print) award-winning 1981 edition conveyed an epic narrative of crucial military operations in early autumn 1864 that had gone unrecognized for more than 100 years. Readers will rejoice that Richard J. Sommers's masterpiece, in a revised Sesquicentennial edition, is once again available. This monumental study focuses on Grant's Fifth Offensive (September 29 to October 2, 1864), primarily the Battles of Chaffin's Bluff (Fort Harrison) and Poplar Spring Church (Peebles' Farm). The Union attack north of the James River at Chaffin's Bluff broke through Richmond's defenses and gave Federals their greatest opportunity to capture the Confederate capital. The corresponding fighting outside Petersburg at Poplar Spring Church so threatened Southern supply lines that General Lee considered abandoning his Petersburg rail center six months before actually doing so. Yet hard fighting and skillful generalship saved both cities. This book provides thrilling narrative of opportunities gained and lost, of courageous attack and desperate defense, of incredible bravery by Union and Confederate soldiers from 28 states, Maine to Texas. Fierce fighting by four Black brigades earned their soldiers thirteen Medals of Honor and marked Chaffin's Bluff as the biggest, bloodiest battle for Blacks in the whole Civil War. In addition to his focused tactical lens, Dr. Sommers offers rich analysis of the generalship of Ulysses S. Grant, Robert E. Lee, and their senior subordinates, Benjamin Butler, George G. Meade, Richard S. Ewell, and A. P. Hill. The richly layered prose of Richmond Redeemed, undergirded by thousands of manuscript and printed primary accounts from more than 100 archives, has been enhanced for this Sesquicentennial Edition with new research, new writing, and most of all new thinking. Teaching future strategic leaders of American and allied armed forces in the Army War College, conversing with fellow Civil War scholars, addressing Civil War audiences across the nation, and reflecting on prior assessments over the last 33 years have stimulated in the author new perspectives and new insights. He has interwoven them throughout the book. His new analysis brings new dimensions to this new edition. Dr. Sommers was widely praised for his achievement. In addition to being a selection of the History Book Club, the National Historical Society awarded him the Bell Wiley Prize as the best Civil War book for 1981-82. Reviewers hailed it as "a book that still towers among Civil War campaign studies" and "a model tactical study [that] takes on deeper meaning . . . without sacrificing the human drama and horror of combat." Complete with maps, photos, a full bibliography, and index, Richmond Redeemed is modeled for a new generation of readers, enthusiasts, and Civil War buffs and scholars, all of whom will welcome and benefit from exploring how, 150 years ago, Richmond was redeemed. International Conference on Industrial Engineering and Engineering Management is sponsored by Chinese Industrial Engineering Institution, CMES, which is the unique national-level academic society of Industrial Engineering. The conference is held annually as the major event in this area. Being the largest and the most authoritative international academic conference held in China, it supplies an academic platform for the experts and the entrepreneurs in International Industrial Engineering and Management area to exchange their research results. Many experts in various fields from China and foreign countries gather together in the conference to review, exchange, summarize and promote their achievements in Industrial Engineering and Engineering Management fields. Some experts pay special attention to the current situation of the related techniques application in China as well as their future prospect, such as Industry 4.0, Green Product Design, Quality Control and Management, Supply Chain and logistics Management to cater for the purpose of low-carbon, energy-saving and emission-reduction and so on. They also come up with their assumption and outlook about the related techniques' development. The proceedings will offer theatrical methods and technique application cases for experts from college and university, research institution and enterprises who are engaged in theoretical research of Industrial Engineering and Engineering Management and its technique's application in China. As all the papers are feathered by higher level of academic and application value, they also provide research data for foreign scholars who occupy themselves in investigating the enterprises and engineering management of Chinese style.
