Wong's Nursing Care of Infants and Children - E-Book Aug 17 2021 The leading text in pediatric nursing, Wong's Nursing Care of Infants and Children takes a unique, easy-to-understand developmental approach to describe the care of children at each age and stage of development. Childhood diseases and disorders are organized by age groups and body systems, and described through the nursing process framework. This edition includes updates on topics such as the new CPR guidelines, immunizations, and pain assessment and management. Written by pediatric experts, Dr. Marilyn Hockenberry and David Wilson, each with nearly 30 years of hands-on experience, this bestseller provides an evidence-based, clinical perspective that shows how the quality of nursing care can impact quality patient outcomes. "A good neonatal and paediatric reference and textbook..." Reviewed by Jo Wilson on behalf of Nursing Times, March 2015 A developmental approach addresses the differences at each stage of the child's growth and enables you to individualize care at the appropriate level for each child. UNIQUE! Quality Patient Outcomes are discussed for major childhood diseases and disorders, showing how nursing care directly impacts patient outcomes. Nursing Care Plans provide models for planning patient care, with rationales explaining why specific nursing interventions have been chosen, and include nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. A focus on family-centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family-Centered Care boxes. Critical thinking exercises use case studies to help you test and develop your own analytical skills. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care. An emphasis on wellness includes principles of health promotion and injury prevention for each age group. Drug Alerts highlight important drug-related information for safe, appropriate care. Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes. Complementary & Alternative Therapy boxes include timely information on alternative medicine as a part of complete, comprehensive care. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress, and provide guidance for performing procedures in a caring

manner. Emergency Treatment boxes serve as a quick reference in critical situations.

Maternal Child Nursing Care Mar 31 2020 **MATERNAL-CHILD NURSING CARE, 2ND EDITION** covers the essential content for the maternity and pediatric nursing courses combined in one affordable text. The inclusion of expert authors, contributors, and reviewers ensures delivery of accurate and up-to-date content in both maternity and pediatric areas. The authors are also noted for their clear writing style that makes content easy to read and understand. The following are the key features retained for the second edition: Nursing Care Plans, Nurse Alerts, Guidelines, Emergency Treatment, Home Care, Cultural Awareness, Family Focus, Patient Teaching and Critical Thinking Exercises. The second edition will also include a new full-color design, greater emphasis on community care and research throughout. (Includes a FREE MERLIN website at: www.harcourthealth.com/MERLIN/Wong/maternal/)

Nursing Management of Women's Health Dec 09 2020 This book covers all the gynecological areas where nurses undertake a key role in managing and leading the care of women. With the constant evolving role of nurses, many of them have been at the forefront of changing practice and breaking through boundaries in areas traditionally carried on by medics. This volume guides those nurses in enhancing their role and moving the practice forward. Paramount within this care is the desire to ensure that women are treated by the right person with the right skills and with dignity to manage intimate and personal issues that have a great effect on quality of life. This book offers best practice guidelines and references to underpin practice and practical tips and hints. It examines many aspects of women's health, from menstrual dysfunction and bleeding, specific adolescent issues, fertility and infertility, to early pregnancy problems, management of pregnancy's termination, urogynecological issues, ambulatory and outpatient procedures and menopause. This volume provides readers with a guide to care for women from the nurse specialist expertise. Many different subspecialties exist in gynecology, and nurses have to take the lead in caring for women, especially for those looked after within the outpatient setting. In addition to the nursing management of these women, some nurses undertake procedures as hysteroscopy and move the care of these women from surgery to an ambulatory setting. This work is written by and dedicated to specialist and practitioners nurses.

Holland-Frei Cancer Medicine Jun 14 2021 **Holland-Frei Cancer Medicine, Ninth Edition**, offers a balanced view of the most current knowledge of cancer science and clinical oncology practice. This all-new edition is the consummate reference source for medical oncologists, radiation oncologists, internists, surgical oncologists, and others who treat cancer patients. A translational perspective throughout, integrating cancer biology with cancer management providing an in depth understanding of the disease An emphasis on multidisciplinary, research-driven patient care to improve outcomes and optimal use of all appropriate therapies Cutting-edge coverage of personalized cancer care, including molecular diagnostics and therapeutics Concise, readable, clinically relevant text with algorithms, guidelines and insight into the use of both conventional and novel drugs Includes free access to the Wiley Digital Edition providing search across the book, the full reference list with web links, illustrations and photographs, and post-publication updates

Nursing Care of the Hospitalized Older Patient Jul 28 2022 **Nursing Care for the Hospitalized Older Patient** is a comprehensive, quick-reference resource for registered and advanced practice nurses working with older patients in a hospital setting. Organized in user-friendly format, the book provides vital information on all aspects of hospital care and the full range of health issues encountered by elderly patients. The book is organized into four major sections. The first section provides an overview of the aging patient, including demographics, normal aging changes, and the general impact of hospitalization. The second section covers proper health assessment, providing guidance on history taking and evaluating laboratory values. The third section is the largest part of the book and is made up of short, similarly-structured chapters dedicated to individual clinical issues ranging from burns to depression. These chapters are organized by body system to maximize ease of use. The book concludes with a section on special considerations that cross common clinical areas, such as palliative care, pain management, fall prevention, and discharge planning.

Long-Term Conditions May 26 2022 This book is a very welcome tool, which will enable health

professionals to understand the complexity, challenge and rewards of proactively managing long-term conditions. Putting this knowledge into skilled practice, in partnership with patients, will transform the lives of many individuals and their families, and thus fulfil the fundamental purpose of nursing. —From the Foreword by Professor Rosemary Cook CBE, Director, the Queen's Nursing Institute and Visiting Professor of Enterprise, University of Northumbria Long-Term Conditions is a comprehensive, practical guide for nurses and healthcare professionals on the care and management of people with chronic illness. It explores case management, individual care and management, the role of the 'expert patient', quality-of-life issues, counselling skills, self-management, and optimum self-care. Long-Term Conditions discusses the three main long-term conditions currently resulting in most hospital admissions: diabetes, respiratory, and coronary heart disease, with a focus on empowering the patient to self-manage. Key Features: A comprehensive guide to the care and management of long-term conditions Focuses on the management of the conditions from the patients' perspective Practical and accessible in style

Fundamentals of Nursing Care Jan 28 2020 Take a fresh, new approach to nursing fundamentals that teaches students how to think, learn, and do while they make the 'connections' each step of the way.

It's everything you need to create and customize effective nursing care plans!

Excellence in Compassionate Nursing Care Feb 08 2021 We are passionately interested in the importance of nursing values and believe that excellence in compassionate nursing care lies at the heart of nursing practice and that leadership is key to making this happen. Every nurse, whatever their position and role, has a vital leadership role to play in ensuring excellent care remains at the heart of nursing practice. From the preface Highly committed nurses often feel disillusioned, disempowered and angry when they are faced with negative media reports about poor standards of care. They are genuinely concerned, and want to address issues, when patients and clients feel they are not being cared for with compassion. However, complex and under-resourced healthcare environments pose many challenges. Developing ideas and initiatives from the highly successful *Compassion and Caring in Nursing*, in this new book Claire Chambers and Elaine Ryder focus on these potential difficulties and offers practitioners a chance to build on their current knowledge and experience, and consider ways to take the lead and act as catalysts for change. Each chapter focuses on a particular issue and case scenarios are used and revisited in each chapter, so that theory and practice are integrated throughout. Specific prompts encourage readers to bring about vital change in practice. All nurses, health visitors and health and social care practitioners should find this book motivating and realistic. It also offers

thought-provoking inspiration for undergraduate and postgraduate healthcare students.

Nursing Care and ECMO Aug 29 2022 This book explores the unique aspects involved in the management of ECMO patients such as pathophysiology and indications, setting up the device, monitoring ECMO and the patient, troubleshooting, ethical aspects and rehabilitation. For the past eight years, management of acute heart failure and Acute Respiratory Distress Syndrome (ARDS) patients has been improved by the development of short-term assistance devices, with ECMO as a first line treatment. This highly informative book provides essential insights for ICU nurses at ECMO centers around the world, who face the substantial challenges involved in the management of ECMO patients. Above all, it meets their training needs with regard to bedside monitoring for these patients, which has become a major issue. The editors and most of the contributors serve at La Pitié-Salpêtrière ICU, France, which, in terms of the number of admissions and major publications produced, is one of the world's leading authorities on ECMO.

Maternity Nursing - E-Book Mar 12 2021 A streamlined approach covers the fundamentals of maternity nursing! Maternity Nursing, 8th Edition focuses on the care of women during the childbearing years. Designed to meet the needs of today's students, the book offers a clear, readable style and a concise, focused presentation. It integrates an understanding of family, culture, and health promotion into the continuum of care, and coverage of community-based care emphasizes nursing care in many different settings. Not only does Maternity Nursing focus on childbearing issues and concerns, including care of the newborn, but it also addresses wellness promotion and the management of common women's health problems. The Evolve companion website includes useful study tools, including medical animations, video clips, a care plan builder, and NCLEX® exam-style review questions. A companion Evolve website includes student resources such as NCLEX® exam-style review questions, audio chapter summaries, a care plan builder, nursing skills, interactive case studies, video clips and animations, anatomy reviews, and an audio glossary with Spanish pronunciations. Unique! Nursing Alerts highlight critical information in providing care. Unique! Emergency boxes provide step-by-step procedures for pediatric and maternity emergencies. Unique! Cultural Considerations boxes discuss customs and beliefs of different cultures that may affect care for patients and families. Unique! Community Activity boxes provide maternal and newborn exercises to enhance care in local community settings. Unique! Nursing Process boxes identify information on major diseases and conditions. Patient Instructions for Self-Management boxes highlight the information nurses need to communicate to patients and families. Critical Thinking exercises are based on case studies of real-life situations. Coverage of nursing care management uses a framework of the five steps of the nursing process as well as a focus on collaborative care. Nursing care plans include specific guidelines and rationales for interventions.

Evidence-based Nursing Care Guidelines Sep 25 2019 From an internationally respected team of clinical and research experts comes this groundbreaking book that synthesizes the body of nursing research for 192 common medical-surgical interventions. Ideal for both nursing students and practicing nurses, this collection of research-based guidelines helps you evaluate and apply the latest evidence to clinical practice.

Impacts of Rationing and Missed Nursing Care: Challenges and Solutions Aug 24 2019 This book reveals how economic restrictions and limited healthcare resources, combined with growing care demands due to advanced technology and more care options, have to a great extent contributed to increased workloads for healthcare professionals and put them under pressure to prioritize their work. This has led to the rationing of care, i.e., to decision-making processes on the allocation of scarce resources, especially human resources, and on which care activities take priority over others; in turn, these processes have led to unfinished or missed care, which has serious implications for quality of care and patient safety. Concerns related to nursing shortages and lean staffing practices have increased the awareness of the problem, as patient outcomes are affected by the quality and quantity of care that they receive and led to intensified scientific inquiry into this phenomenon. This book is written by the members of the Rancare Cost Action group, whose aim is to facilitate discussion about rationing

of nursing care based on a cross-national comparative approach with implications for practice and professional development. Four working groups investigated four areas for four years: a) the conceptualization of care rationing and methodological inquiries concerning the investigation of the phenomenon, b) exploration of possible solutions and intervention studies, c) the ethical perspective of care rationing and missed care including patients' rights and possible discrimination, and d) the educational implications, based on an exploration of the level of patient safety training and care rationing, as well as preparing guidelines for managers. The book will be a valuable resource for nurses, allied healthcare professionals, managers, policymakers, researchers, ethical committees, and educators whose goal is to provide better and safer care.

Manual of Psychiatric Nursing Care Planning Dec 29 2019 A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 5th Edition supplies you with the latest diagnostic information available, including the DSM-5, for accurate assessment and diagnosis of patients. It offers quick and easy access to plans of care for a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth Varcarolis, provides a clinically-based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. The latest diagnoses, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. A focus on clinical information furnishes you with information on providing patient care in a range of settings. Assessment Guides, including tables, charts, and questionnaires facilitate patient diagnosis and care. A chapter on Major Psychotropic Interventions and Patient and Family Teaching, in addition to the content found in each disorder chapter, helps you better understand the uses and workings of the psychotropic agents. Coverage of major disorders exposes you to a wide range of disorders within psychiatric nursing. NEW! The most recent information in the field, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. NEW! 2007 ANA Psychiatric Mental-Health Nursing Scope and Standards of Practice familiarize you with the current guidelines for the practice of psychiatric nursing. NEW! Updated 2012-2014NANDA-I Nursing Diagnoses present information on the latest nursing diagnoses related to psychiatric nursing. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients.

Nursing Care of Children Sep 05 2020

Cancer in Children and Young People Jan 10 2021 Much has changed since the first book Paediatric Oncology: Acute Nursing Care (1999), therefore, this new edition encompasses these changes in relation to the practice itself and the evidence that underpins it. Emphasis is placed on ensuring terminology is accurate, in keeping with the language of the current day. The book is divided into six sections: Chemotherapy, Haematopoietic Stem Cell Transplantation, General Surgery, Radiotherapy, Late Effects of cancer therapies, and Palliative Care. There is a brief commentary at the end of each section/chapter by a 'novice' author but experienced practitioner, highlighting to the reader what is already known and what the section/chapter adds to their current knowledge and practice.

Nursing Care Plans - E-Book Jan 22 2022 Get everything you need to create and customize effective nursing care plans, now with evidence-based ICNP® diagnoses! Covering the most common medical-surgical nursing diagnoses and clinical problems, Gulanick & Myers' Nursing Care Plans: Diagnoses, Interventions, and Outcomes, 10th Edition features more than 200 care plans, each reflecting the latest evidence-based guidelines and national and international treatment protocols. It also features highlighted QSEN competencies and a clear differentiation of nursing and collaborative interventions. New to this edition are ICNP® diagnoses, care plans on LGBTQ health issues and on electrolytes and acid-base balance, and a new Online Care Planner that makes it easier than ever to customize care plans. Written by noted educators Meg Gulanick and Judith L. Myers, this #1 care planning book will

help you learn to think like a nurse! 61 patient problem care plans include the most common/important patient problems, providing the building blocks for you to create your own individualized care plans. 164 disorder care plans cover virtually every common medical-surgical condition, organized by body system. Patient problem care plan format includes a definition/explanation of the diagnosis, related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions. Disorder care plan format covers synonyms for the disorder (for ease in cross referencing), a definition, common related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions for each relevant nursing diagnosis. Prioritized care planning guidance internally organizes care plans from "actual" to "risk" diagnoses, from general to specific interventions, and from independent to collaborative/interprofessional interventions, to help you select the most important, priority interventions for your particular patients. NEW! Updated care plans are now based on the evidence-based, complete, and internationally accepted International Classification of Nursing Practice (ICNP®) nursing diagnoses. NEW! 19 all-new care plans are featured in this edition. NEW! Updated content throughout reflects the most current evidence-based practice and national and international guidelines. NEW! Online Care Planner on the Evolve website allows you to easily generate customized care plans based on the book's content. NEW! Improved focus on core content includes several care plans that have been moved from the book's Evolve website.

The Nursing Care of Children Oct 07 2020

Creating Connections Between Nursing Care and the Creative Arts Therapies Nov 07 2020 The primary goal of this text is to promote educational advancement for health care professionals on the topic of how creative arts therapies can assist patients and clients to achieve specific goals or outcomes. More specifically, the book seeks to create a closer connection between nursing care and the creative arts therapies in order to promote professional collaboration and to expand the concept of holistic care. Most of its twenty chapters explore the theoretical and practical implications of the creative arts therapies as illustrated in single and multiple-case studies. The chapters' authors are creative arts therapists, nurses, social workers, therapeutic recreation specialists, and occupational therapists. They describe creative therapeutic approaches involving art, music, creative writing, dance/movement, and drama in various health care settings. This unique book is designed for a wide range of health care professionals, including nursing, the creative arts therapies, psychology, social work, medicine, occupational, recreational, and physical therapies, and others who are interested in learning more about creative treatment approaches and their application to varied care settings.

Wong's Nursing Care of Infants and Children - Binder Ready Oct 26 2019 Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, you can personalize the text to match your unique study needs! Prepare to give pediatric patients the specialized care they deserve with the leading text in pediatric nursing. Written by pediatric experts, Wong's Nursing Care of Infants and Children, 11th Edition takes a unique, easy-to-follow developmental approach to describe the care of children at each age and stage of development. This longtime bestseller provides an evidence-based, clinical perspective that shows how the quality of nursing care can impact quality patient outcomes. Childhood diseases and disorders are organized by age groups and body systems and explained through the nursing process framework. This edition features completely updated and reorganized chapters that present content in a clear, easy-to-understand way. New Quality Indicator boxes paint a bigger picture of hospitals and how they look at quality and safety. A focus on family-centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family-Centered Care boxes. Emergency Treatment boxes serve as a quick reference in critical situations. Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes. Quality Patient Outcomes are discussed for major childhood diseases and disorders, showing how nursing care directly impacts patient outcomes. Nursing Tips include helpful hints and practical, clinical information. Critical Thinking Case Studies help you test and develop your own analytical skills. Cultural Considerations provide cultural tips from clinical experts. Nursing Care Plans provide models for planning patient care, with rationales explaining why

specific nursing interventions have been chosen, and include nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. Nursing Care Guidelines offer clear, step-by-step, detailed instructions on performing specific skills or procedures. Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to support, guide, and improve the outcomes of nursing care. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress, and provide guidance for performing procedures in a caring manner. Community and Home Health Considerations boxes focus on wellness information and illness-related topics. Drug Alerts highlight important drug-related information for safe, appropriate care. Nursing Alerts provides critical information that must be considered in providing care. Research Focus boxes emphasize research with concise reviews of important evidence. NEW! Quality Indicator boxes present a bigger picture of hospitals and how they look at quality and safety, or Pediatric Clinical Quality Measures. EXPANDED! Added emphasis on the impact of genetics and genomics on pediatric nursing care. NEW and UPDATED! New information on Zika virus and Rotavirus keeps you in the know. NEW! New section on Chiari malformation added to neurologic dysfunction chapter. NEW! Self-harm, GLBT, and e-cigarette content added to adolescent problems chapter. UPDATED! Oxygen and carbon dioxide exchange information is now included throughout the text. EXPANDED! Updated accidental poisoning section now includes cleaning solutions and liquid from e-cigarettes. UPDATED! New Impact of Chronic Illness, Disability, or End of Life Care for the Child and Family chapter thoroughly combines two previous chapters. UPDATED! Integumentary dysfunction content now appears as chapter 32. UPDATED! Reorganized chapter on pain provides specific guidelines for pediatric pain assessment and management and focuses on common acute and chronic pain conditions and how to manage them. UPDATED! Human Papillomavirus content significantly updated. EXPANDED and UPDATED! Disorders with behavioral components section significantly expanded. UPDATED! Updated influenza, RSV, and acute lung injury section in respiratory chapter. UPDATED! Childhood cancer survivor section has significant updates.

Nursing Care of Older People Sep 29 2022 Nursing care of older people provides a new, contemporary, evidence based and practical guide to meeting the holistic health needs of older patients. With a clear and engaging style, the authors outline a rigorous and robust account of underlying principles and evidence with tools and tips for best nursing practice. This comprehensive textbook examines the changes brought about by the ageing process to both physical and mental health as well as learning disabilities. Providing essential insights necessary to deliver high quality nursing in primary and hospital care, this text covers a wide range of issues and clinical topics. Learning is aided by case studies, nursing insights, activities, and reflection enabling readers to apply theory to practice. This text is particularly useful for pre and post registration student nurses, qualified nursing staff, and other healthcare professionals working alongside nurses to deliver care to older people. The online resource centre to accompany Nursing care of older people features: For students and lecturers - Additional interactive case studies. - National policy links. - Website links to national older people organizations, charities and support groups and links to journals on older patients in health care. - Audio podcasts on the nursing care of older people.

Psychosocial Nursing Care of the Aged Feb 29 2020

Nursing Care Plans Apr 24 2022 The bestselling nursing care planning book on the market, *Nursing Care Plans: Diagnoses, Interventions, and Outcomes*, 8th Edition covers the most common medical-surgical nursing diagnoses and clinical problems seen in adults. It includes 217 care plans, each reflecting the latest evidence and best practice guidelines. NEW to this edition are 13 new care plans and two new chapters including care plans that address health promotion and risk factor management along with basic nursing concepts that apply to multiple body systems. Written by expert nursing educators Meg Gulanick and Judith Myers, this reference functions as two books in one, with 147 disorder-specific and health management nursing care plans and 70 nursing diagnosis care plans to use as starting points in creating individualized care plans. 217 care plans --- more than in any other nursing care planning book. 70 nursing diagnosis care plans include the most common/important

NANDA-I nursing diagnoses, providing the building blocks for you to create your own individualized care plans for your own patients. 147 disorders and health promotion care plans cover virtually every common medical-surgical condition, organized by body system. Prioritized care planning guidance organizes care plans from actual to risk diagnoses, from general to specific interventions, and from independent to collaborative interventions. Nursing diagnosis care plans format includes a definition and explanation of the diagnosis, related factors, defining characteristics, expected outcomes, related NOC outcomes and NIC interventions, ongoing assessment, therapeutic interventions, and education/continuity of care. Disorders care plans format includes synonyms for the disorder (for easier cross referencing), an explanation of the diagnosis, common related factors, defining characteristics, expected outcomes, NOC outcomes and NIC interventions, ongoing assessment, and therapeutic interventions. Icons differentiate independent and collaborative nursing interventions. Student resources on the Evolve companion website include 36 of the book's care plans - 5 nursing diagnosis care plans and 31 disorders care plans. Three NEW nursing diagnosis care plans include Risk for Electrolyte Imbalance, Risk for Unstable Blood Glucose Level, and Risk for Bleeding. Six NEW health promotion/risk factor management care plans include Readiness for Engaging in a Regular Physical Activity Program, Readiness for Enhanced Nutrition, Readiness for Enhanced Sleep, Readiness for Smoking Cessation, Readiness for Managing Stress, and Readiness for Weight Management. Four NEW disorders care plans include Surgical Experience: Preoperative and Postoperative Care, Atrial Fibrillation, Bariatric Surgery, and Gastroenteritis. NEW Health Promotion and Risk Factor Management Care Plans chapter emphasizes the importance of preventive care and teaching for self-management. NEW Basic Nursing Concepts Care Plans chapter focuses on concepts that apply to disorders found in multiple body systems. UPDATED care plans ensure consistency with the latest U.S. National Patient Safety Goals and other evidence-based national treatment guidelines. The latest NANDA-I taxonomy keeps you current with 2012-2014 NANDA-I nursing diagnoses, related factors, and defining characteristics. Enhanced rationales include explanations for nursing interventions to help you better understand what the nurse does and why.

Manual of Critical Care Nursing - E-Book Apr 12 2021 It's the ideal go-to reference for the clinical setting! Compact and easy to use, *Manual of Critical Care Nursing*, 6th Edition presents essential information on approximately 80 disorders and conditions, as well as concepts relevant to caring for all critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialists Marianne Baird and Sue Bethel separate the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. A concise format presents the material in a way that reflects a practicing nurse's thought processes. Coverage of approximately 80 critical care conditions/disorders includes those most commonly seen in critical care units. Chapter outlines provide easy access to disorders. A portable size makes it ideal for use in the unit or bedside, and is also easy to carry on campus. Unique! Gerontology icon highlights considerations relating to the care of older adults. Unique! Research briefs in special boxes discuss selected research studies for evidence-based patient care. Unique! The latest NANDA-approved nursing diagnoses increase familiarity with NANDA terminology. Appendixes provide quick reference to information needed in the critical care setting. Revised format mirrors a practicing nurse's approach to patient care, making it easier to find information. Newly formatted care plans incorporate diagnoses, interventions, and desired outcomes in a consistent, logical organization. Patient safety alerts and high alerts call attention to issues important to a patient's safety. Unique! Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Unique! Collaborative Management tables concisely summarize key points while incorporating nationally recognized guidelines. Colored tabs mark the location of each body system, making topics easier to find. Smaller trim size increases portability for use in the unit or bedside, while enhancing readability.

Nursing Care of Children and Young People with Long-Term Conditions Dec 01 2022 The second

edition of *Nursing Care of Children and Young People with Long Term Conditions* remains the only nursing-specific text on the care of paediatric patients with chronic illness. Written to meet the needs of nursing students and professionals alike, this comprehensive volume provides authoritative and up-to-date information on the context, theory, and practice of delivering holistic care to children and families in a range of health and social care settings. Contributions from a team of experienced academics, educators, and practitioners offer valuable insight into the impact of chronic illness on children and parents, the practical implications of meeting their physical, psychological, and social needs, empowering them to be 'experts' in their care, and many more vital aspects of long-term paediatric care. This edition features new and revised content reflecting contemporary guidelines and evidence-based practice, including updated clinical case studies and a new chapter examining the impact of having a sibling with a long-term condition. Emphasising a multi-disciplinary approach to managing chronic illness, this important resource: Provides numerous case studies and activities illustrating the application of theoretical principles and current evidence in nursing practice Investigates the genetic basis of chronic illness and the differing onsets of long-term conditions Discusses current political, economic, and social policies that are influencing healthcare for children and bringing challenges to managers and practitioners Examines both classic and contemporary theories of grief, loss, coping, and adaptation Explores ethical, legal, and professional aspects of nursing children and young people with chronic illness Addresses evolving nursing roles, the importance of acute emergency care, and the planning and delivery of effective transition from child to adult services *Nursing Care of Children and Young People with Long Term Conditions* is required reading for student and registered children's nurses, as well as for practitioners in related health and social care disciplines.

LeMone & Burke's Adult Nursing Jul 04 2020 Adapted from: *Medical-surgical nursing: critical thinking in client care* / [edited by] Priscilla LeMone, Karen Burke. 4th ed. c2008.

RN Nursing Care of Children Edition 10. 0 Nov 19 2021

Nursing Care Jan 02 2023 Go 'back to basics' with this concise, clear text on the essentials of nursing care. Comprehensively covers all aspects of essential care Puts care into context and relates it to current UK Government policy and targets Shows how to apply theory in practice using diagrams and case studies Uses a 'reflective' theme throughout, in line with current teaching practice Explains Clinical Skills in the context of care Includes a companion website (www.pearsoned.co.uk/field) to support learning The book is designed to help the student develop a proactive approach to the assessment, planning, implementation and evaluation of the care that they give. The invaluable advice can be applied to all branches of nursing and to all environments where patients are nursed, whether in hospital, at home or care homes. Essential reading for nursing students, qualified nurses and all health and social care workers

Psychosocial Nursing: A Guide To Nursing The Whole Person Jun 26 2022 Nursing involves caring for the whole person, and taking care of both physical and psychosocial needs. This book aims to help the reader to develop the knowledge, skills and confidence to care for the whole person and to ensure the patient is at the centre of the care-giving experience. The book considers different aspects of therapeutic nursing care and explains how you can make the most of opportunities to nurse the whole person. Key topics covered include: Understanding the personal experience of illness Communication and listening skills Developing nurse-patient relationships Psychosocial assessment skills Using psychotherapeutic approaches Since it is common for those who are physically ill to feel psychologically vulnerable, the book also has chapters exploring how to care for patients who are anxious, depressed, psychotic or display challenging behaviours. All chapters include case studies and personal stories of illness to help illustrate the range of practice opportunities for improving your nursing care of the whole person. An essential read for all nurses looking to hone their craft and for those preparing to qualify who want a deeper understanding of the true art of nursing.

Nursing Care Plans Oct 19 2021 This edition contains 189 care plans covering the most common nursing diagnoses and clinical problems in medical-surgical nursing. It includes four new disorders care plans, SARS, Lyme disease, West Nile virus, and obstructive sleep apnea.

Nursing Care of Children and Young People with Chronic Illness Jul 16 2021 Children and young people suffering from long-term conditions require continuing support and nursing care throughout their lives. *Nursing Care of Children and Young People with Chronic Illness* explores chronic disease management in the context of recent developments, including the National Service Framework for Children. It addresses the aetiology of chronic illness and the impact on the child's family. It also explores holistic approaches to caring for their social, physical and psychological needs, and highlights the importance of the nurse's role in promoting children and their parents as 'expert patients'. *Nursing Care of Children and Young People with Chronic Illness* is a comprehensive, up-to-date resource for nursing students and practitioners on the context, theory and practice of assessing health needs, and the delivery of holistic care and services within a variety of care settings, to enable them to meet the changing needs of children and young people with chronic illnesses and diseases, and their families. The first nursing-specific text related to the care of children & young people with chronic illness Incorporates case studies & scenarios throughout to enable readers to gain an understanding of the application of concepts & theories in practice Covers care aspects of the child and young person in different settings including tertiary, secondary, primary health care and the home Written in the context of the NSF for Children

Nursing Care and the Activities of Living Dec 21 2021 This book gives a practical focus to the underpinning theory of nursing in order to help students through the academic part of their undergraduate course as well as their placement. The book is based on the activities of living model so each activity has its own chapter, allowing readers to dip in and out. It is essential reading for students, enabling them to understand and manage the many clinical issues they face on a daily basis when nursing adults on wards, in clinics and in the community setting.

Nursing Care Planning Made Incredibly Easy! Oct 31 2022 The new edition of *Nursing Care Planning Made Incredibly Easy* is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

Manual of Psychiatric Nursing Care Planning - E-Book Jun 02 2020 A pocket-sized clinical companion, *Manual of Psychiatric Nursing Care Planning*, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany *Foundations of Mental Health Nursing*, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 *Psychiatric Mental-Health Nursing: Scope and Standards of Practice*. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric

patients, for optimal drug therapy.

Conceptual Nursing Care Planning Mar 24 2022

Medical Surgical Nursing Care Aug 05 2020 *Medical Surgical Nursing Care 3e* has an even stronger focus on the professional Practical nursing program and is a key component in the LPN/LVN series at Pearson. It has a clear and readable writing style, it provides a strong foundation for understanding common disorders that affect adults. Opening units of the book focus on concepts, issues, and foundational knowledge. The units that follow focus on common diseases and disorders organized by body system. Each unit begins with review of the system's structure and function, nursing assessment, and commonly used diagnostic tests for disorders of that system. To facilitate learning, disorder-specific content follows a consistent pattern, beginning with discussion about the disorder, its risk factors, causes, effects on the body, manifestations, and possible complications. Because nurses are integral members of the healthcare team, interdisciplinary care sections include nursing implications for medications, nutritional therapies, surgery and other treatments, including complementary therapies. Each disorder concludes with nursing care, including priorities of care, health promotion, assessment, nursing care measures, and a section addressing continuity of care to home or the community. This text provides more depth in common disease processes, their treatment, and related nursing care. Although organized by body systems for clarity, the book retains a nursing focus throughout. Rationales are provided for nursing interventions to help the student understand the why, not just the what.

A Life-span Approach to Nursing Care for Individuals with Developmental Disabilities May 02 2020

Written by and for nurses, this comprehensive reference provides sound theory-based approaches and practical recommendations for the individualized nursing care of people with developmental disabilities. Using in-depth case studies, helpful charts and tables, and problem-solving strategies, the book addresses fundamental nursing issues such as health promotion, infection control, seizure management, adaptive and assistive technology, and sexuality. It's an ideal resource for nurses working in community-based centers, schools, group homes, residential centers, and home health programs and an excellent guide for student nurses and other health care professionals.

Wong's Nursing Care of Infants and Children Feb 20 2022 The leading text in pediatric nursing, *Wong's Nursing Care of Infants and Children* takes a unique, easy-to-understand developmental approach to describe the care of children at each age and stage of development. Childhood diseases and disorders are organized by age groups and body systems, and described through the nursing process framework. This edition includes updates on topics such as the new CPR guidelines, immunizations, and pain assessment and management. Written by pediatric experts, Dr. Marilyn Hockenberry and David Wilson, each with nearly 30 years of hands-on experience, this bestseller provides an evidence-based, clinical perspective that shows how the quality of nursing care can impact quality patient outcomes. A developmental approach addresses the differences at each stage of the child's growth and enables you to individualize care at the appropriate level for each child. UNIQUE! Quality Patient Outcomes are discussed for major childhood diseases and disorders, showing how nursing care directly impacts patient outcomes. Nursing Care Plans provide models for planning patient care, with rationales explaining why specific nursing interventions have been chosen, and include nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. A focus on family-centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family-Centered Care boxes. Critical thinking exercises use case studies to help you test and develop your own analytical skills. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care. An emphasis on wellness includes principles of health promotion and injury prevention for each age group. Drug Alerts highlight important drug-related information for safe, appropriate care. Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes. Complementary & Alternative Therapy boxes include timely

information on alternative medicine as a part of complete, comprehensive care. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress, and provide guidance for performing procedures in a caring manner. Emergency Treatment boxes serve as a quick reference in critical situations. NEW! NCLEX® exam-style review questions allow you to test your understanding of text content and practice answering application-based NCLEX questions. NEW! Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to support, guide, and improve the outcomes of nursing care. UPDATED content includes the new CPR guidelines, pain assessment and management, immunizations, asthma, and updated interventions. NEW! Community and Home Health Considerations boxes focus on wellness information and illness-related topics.

High Dependency Nursing Care Nov 27 2019 Level 2 (highly dependent) patients are nursed in a variety of clinical areas. High Dependency Nursing Care has been written for pre qualified and post qualified students undertaking modules and placements to prepare them for nursing the acutely ill and nurses caring for these patients. Written by a team of nurses experienced in providing, supporting and developing high dependency care, it discusses practical issues and explores the current evidence base for clinical practice. This essential textbook covers the context of care with chapters on fundamental aspects, such as sleep, nutrition, pain management and stress. It goes on to look at the main causes of critical illness and the treatments often given, as well as the skills necessary for monitoring patients. Completely updated throughout, this second edition also includes new chapters on infection control, heart failure, tissue removal and transferring the sicker patient. High Dependency Nursing Care is: Comprehensive: it covers all the key areas of knowledge needed User-friendly: it includes learning outcomes, introductions, time out exercises, implications for practice, useful websites and up-to-date references Clearly written: by a team of experienced nurses Practically based: clinical scenarios provide stimulating discussion and revision topics
