The Gravimetric Determination of Nickel in Uranium-nickel Alloys with Dimethylglyoxime Oct 01 2020

A Geoid and World Geodetic System Based on a Combination of Gravimetric, Astro-geodetic, and Satellite Data Feb 17 2022 A world-wide estimate of the gravity field, based on all available gravimetry and extended by Markov analysis using correlation with elevation, was combined with an estimate of the geoid based on astro-geodetic data covering 19% of the earth and with secular and long period variations of the 1957 Beta and 1958 Beta satellite orbits, into a generalization of least-squares adjustments taking correlation into account. The value obtained for the quadratic sum indicated that the estimates of variance and covariance should be increased about 44%. The results obtained include: Equatorial radius, 6378163 + or - 21 m; Flattening, 1/298.24 + or - 0.01; Equatorial gravity, 978043.6 + or - 1.2 milligals (Potsdam system); Datum shifts (with three-dimensional standard deviation) for the Americas system, + or - 35 m; Europe-Africa-Siberia-India system, + or - 38 m; Japan-Korea-Manchuria system, + or - 68 m; Coefficients in the spherical harmonic expression of the gravity field up to the 8th degree; and World-wide geoid heights, with standard deviations varying from + or - 10 m to + or - 22 m. (Author).

Recent Geodetic and Gravimetric Research in Latin America Jul 22 2022

The 18 papers of the book give a comprehensive overview over recent advances of geodetic research in Latin America. The book is divided in three parts: 1. Geodetic and gravimetric control in Latin America 2. Regional Gravity and Geoid Determination 3. Geodynamic Research Projects The Symposium was held in Vienna, August 1991, at the General Assembly of the International Union of Geodesy and Geophysics.

Determination of Plumb Line Curvatures by Astronomical and Gravimetric Methods Sep 19 2019

The Gravimetric Determination of the Parameters of the Earth and Its Gravity Field Aug 19 2019

The Gravimetric Determination of Trace Amounts of Carbon in Sodium Metal Aug 31 2020

Improved U235 Measurements at the Paducah Plant Through Refinements in the Gravimetric Oxide Dilution Procedure Aug 11 2021

Comparison of Respirable Dust Concentrations Measured with Personal Gravimetric Sampling Instruments Operated On-section and Portal-to-portal May 28 2020

An Improved Gravimetric Method for Analyzing Blast Furnace Top Gas Mar 06 2021

A Comparison of the Gravimetric and Volumetric Determinations of Free UO₂ in Uranium Dioxide Apr 19 2022

The Journal of Biological Chemistry Nov 26 2022 Vols. 3-140 include the society's Proceedings, 1907-41

How to Evaluate Longwall Dust Sources with Gravimetric Personal Samplers Feb 05 2021 Longwall double-drum shearers frequently have difficulty complying with the 2.0 mg/ m³ dust standard and, therefore, require the use of effective dust controls. However, before dust controls can be implemented effectively, the major individual dust sources must be determined and their relative severity evaluated. The Bureau of Mines has recently developed a sampling strategy, based upon short term gravimetric samplings that can identify the major dust sources contributing to the shearer operator's exposure. This technique utilizes approved gravimetric sampling equipment already available to all mine operators and can be performed by two people in 2 days. Five examples, including data analysis, are discussed with respect to various cutting sequences. In addition, typical dust source contributions obtained from studies of double-drum shearer operations regularly in compliance are included. Mine operators can thereby compare their dust source evaluation results with those from these longwalls.

A Comparison of the Babcock Test and the Gravimetric Method of Estimating Fat in Skim Milk ; The Alkaline Tablet Test of Acidity in Milk Or Cream Mar 18 2022

The Gravimetric Determination of Rhodium in Uranium-rhodium Alloys Jan 04 2021

Gravimetric Effects of Petroleum Accumulations Dec 15 2021

Gravimetric Analysis; 1 Aug 23 2022 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Introductory Titrimetric and Gravimetric Analysis Dec 27 2022

Introductory Titrimetric and Gravimetric Analysis discusses the different types of titration and the weighing of different solutions in solid form.

Coverage is made on acid- base titration, argentometric titrations, and oxidation- reduction titrations. Iodometric titrations and complexometric titrations are also explained. Extensive discussion on each of the titration method, along with some examples and laboratory experiments, is given.

The process of weight measurement of damp powder is one example of the experiments. The book is a manual that guides a student to the correct ways of conducting an experiment made on such solutions as

sodium hydroxide using hydrochloric acid and oxalic acid. Outcome of such experiments in terms of composition, weight of solutions, and measurement of pressure in certain environment is tabulated and briefly explained.

Logarithms and antilogarithms are included at the end of the book. The text will serve as a good laboratory manual for students

preparing for science examination as well as for chemists and chemical engineers.

Gravimetric Preparation of Primary Standard Gas Mixtures in the Parts Per Trillion Range Jul 10 2021

Gravimetric Analysis Nov 14 2021 Gravimetric Analysis, Part III describes the experimental procedures for the gravimetric analysis of various compounds. This book is composed of 13 chapters that also present sample preparation protocols. The first four chapters survey the steps for halogen compound determination. The succeeding chapters provide the procedures for gravimetric determination of cyanide, thiocyanate ions, sulfur, nitrogen, phosphorus, carbon, silicon, and boron. The final chapter considers other aspects of gravimetric experiments, including apparatus cleaning, reagents, and numerical calculation of the result. This book will prove useful to analytical and inorganic chemists, teachers, and students in the allied fields.
