This volume of essays examines the ways in which magical practices are found in different aspects of contemporary capitalist societies. From contract law to science, by way of finance, business, marketing, advertising, cultural production, and the political economy in general, each chapter argues that the kind of magic studied by anthropologists in less developed societies - shamanism, sorcery, enchantment, the occult - is not only alive and well, but flourishing in the midst of so-called 'modernity'. Modern day magicians range from fashion designers and architects to Donald Trump and George Soros. Magical rites take place in the form of political summits, the transformation of products into brands through advertising campaigns, and the biannual fashion collections shown in New York, London, Milan and Paris. Magical language, in the form of magical spells, is used by everyone, from media to marketers and all others devoted to the art of 'spin'. While magic may appear to be opposed to systems of rational economic thought, Moeran and Malefyt highlight the ways it may in fact be an accomplice to it. ""This book contains a careful, thorough, and where necessary skeptical as regards doubtful evidence (especially in the case of Plato and the Old

Academy) of the beginnings in European thought of the negative or apophatic way of thinking and its relations to more positive or kataphatic ways of thinking about God. One of its greatest strengths, perhaps the greatest, is that the author makes clear that none of the persons concerned, Hellenic, Jewish or Christian, was engaged in the pursuit of a philosophical abstraction, or the heaping of rhetorical superlatives on God. They were rather concerned to present the origin of the universe as an intimately present living reality which infinitely transcends our thought and speech. This, combined with careful attention to the varieties of negative theology and its relations with positive, and the particular difficulties experienced by the members of the various traditions involved, makes the book the best introduction to the negative theology available.""

Ignorant, irrational and irresponsible: these are the terms used by Plato when referring to poets. Yet the philosopher acknowledged that he was not insensible to the charms of poetry, and many would agree that Plato's myths are themselves poetry of the very first rank. In Plato's Defence of Poetry--the first full-scale treatment of the subject since 1905--Julius A. Elias demonstrates that Plato offers a defence of poetry in response to his own famous challenge. This study restores the myths to their proper place in the Platonic corpus by showing their methodological relationship to the dialectic and their substantive connection to Plato's theories of knowledge, ethics, politics, and aesthetics. While agreeing that for Plato, poetry must be harnessed to the service of truth and socially desirable values, Elias shows that poetry is indispensable to the philosopher: when the audience would reject a more obviously didactic approach, poetry makes accessible and palatable truths demonstrable by reason. Furthermore--and this is the most novel and important feature of this study--Elias argues that the myths embody the indemonstrable axioms of Plato's system. Plato was aware that in every system, including mathematics, certain fundamental presuppositions necessarily remain unproven. Rather than assert them dogmatically, Plato expresses these undercurrents poetically so as to capture their emotional persuasiveness while defining their relevance. In Plato's Defence of Poetry, the myths themselves are interpreted afresh in light of these claims. Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an

autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. Looks at fifty of the twentieth century's most significant contributors to the debate on education. Each essay gives key biographical information, an outline of the individual's principal achievements and activities, an assessment of his or her impact and influence and a list of their major writings and suggested further reading.
